

Will my Scrub Daddy smell?

Scrub Daddy will not smell after 2 weeks.

Can I exfoliate with my Scrub Daddy?

Yes! FlexTexture® was originally designed to scrub hands. Keep in mind that it may be abrasive when used in cold water. We recommend starting with warm water for a soft texture, reducing the water temperature gradually if needed.

Are the different colors for specific applications?

Colorful scrubbers make it easy to avoid cross contamination or simply better coordinate with your décor! The choice is yours.

What is the life span of my scrubber?

Like any soft material, our foam will deteriorate over time. Harsh scrubbing or rough surfaces will erode the foam faster than with gentle use.

Will my scrubber hold water?

FlexTexture® foam does not absorb as much water as a common sponge, especially when cold.

How long does the lemon scent last?

The lemon scent will dissipate gradually over time.

How can I clean a dirty Screen Daddy?

To clean and revitalize the adhesive backing, hand wash with warm soapy water and let air dry.
