cook’s essentials

8Qt. Electric Pressure Cooker

Model K33957 012 000(Black Finish)
K33957 172 000(Red Finish)

INSTRUCTION MANUAL
Before operating your new appliance, please read all instructions carefully and keep for future reference.

IMPORTANT SAFEGUARDS

When using pressure cookers, basic safety precautions should always be followed:
1. Read all instructions before operation.
2. Do not operate while unattended.
3. Do not touch hot surfaces. Use handles or knobs.
4. Close supervision is necessary when the pressure cooker is used near children.
5. DO NOT allow children to operate under any circumstance.
6. Do not place the pressure cooker in a heated oven or on a stove top.
7. Extreme caution must be used when moving a pressure cooker containing hot liquids.
8. Do not use pressure cooker for other than intended use.
9. Never immerse product in water or other liquids.
10. This appliance cooks under pressure. Improper use may result in serious injury.
11. Make certain unit is properly closed before operating. See “Operating Instructions.”
12. Do not fill the unit over 3/4 full. When cooking foods that expand during cooking such as rice or dried vegetables, do not fill the unit over 1/2 full. Over filling may cause a risk of clogging the vent pipe and developing excess pressure. Failure to follow this procedure can result in injury to person(s) and/or damage to the unit.
13. Be aware that certain foods, such as applesauce, cranberries, pearl barley, oatmeal or other cereals, split peas, noodles, macaroni, rhubarb, or spaghetti can foam, froth, spatter, and clog the pressure release device (steam vent). These foods should not be cooked in a pressure cooker.
14. Always check the pressure release devices for clogging before use.
15. Do not open the pressure cooker until the unit has cooled and all internal pressure has been released. If it is difficult to turn, this indicates that the cooker is still pressurized – do not force it open. Any pressure in the cooker can result in serious injury. See “Operating Instructions.”
16. Do not use this pressure cooker for pressure frying with oil.
17. DO NOT place the product near flammable materials or use in a humid environment.
18. DO NOT damage the Rubber Seal Ring and DO NOT replace it with anything other than the replacement Ring designated for this unit.
19. DO NOT tamper with the Steel Ring in the Lid (2) with any tools or external forces. If the Steel Ring is damaged (2), please stop using immediately and replace the Lid.
20. Clean the Filter (20) regularly to keep the cooker clean.
21. NEVER use additional weight on the Pressure Limiting Valve (3) or replace the Pressure Limiting Valve (3) with anything not intended for use with this unit.
22. The surface of contact between the Inner Pot (8) and the Electronic Heater (18) should always be clean. DO NOT use the Inner Pot with other heating sources. DO NOT replace the Inner Pot with a container other than what is recommended by the manufacturer.
23. The Inner Pot consists of a non-stick surface. To avoid scratching the non-stick surface, please use wooden or plastic utensils.
24. Food should not be kept warm for more than 8-10 hours in order to maintain the freshness of the food.
25. The pressure cooker should not be used for pressure cooking for more than 6 hours continuously.
26. Serious Injury and/or damage may occur if any safeguards are ignored.
27. If steam escapes around the Lid (2) during the cooking process, please unplug from the power supply immediately, let cool, remove contents and return the product to the manufacturer for exchange or repair. The Pressure Discharging Device has activated. This is a safeguard to alert the user that the Pressure Limiting Device is malfunctioning.
28. If there is any malfunction of the cooker during the cooking process, please stop using the device and return to the manufacturer for repair or exchange.

29. DO NOT disassemble the product, or replace parts with parts not intended for this unit.

30. This appliance is not intended for use by persons (including children) with reduce physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

31. Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.

32. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or adjustment.

33. The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.

34. Do not use outdoors.

35. Do not let cord hang over edge of table or counter, or touch hot surfaces.

36. Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to “off”, then remove plug from wall outlet.

37. Be careful when moving the appliance containing hot liquid.

38. A short detachable power-supply cord should be used to reduce the risk resulting from becoming entangled in or tripping over a longer cord.

39. Longer detachable power-supply cords or extension cord are available and may be used if care is exercised in their use.

40. If a longer detachable power-supply cord or extension cord is used:
   • The marked electrical rating of the cord set or extension cord should be at least as great as the electrical rating of the appliance.
   • The cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over unintentionally.

41. If the appliance is of the grounded type, the extension cord should be a grounding-type 3-wire cord.

SAVE THESE INSTRUCTIONS FOR HOUSEHOLD USE ONLY

SAFETY WARNING: There is a potential risk of fire, electric shock or injury to persons if the product is not used as instructed. Protection against electric shock is assured only if the main power cord is connected to a properly grounded 110-120V | 50/60Hz power receptacle.

• This product is to be used in an indoor environment only and is not intended for commercial use.
• All parts and accessories for this appliance must be used properly according to the instructions. All parts and accessories must be the original provided from manufacturer. All parts or accessories not intended for use with this appliance is strictly prohibited.
• The use of an extension cord, power adapter or other electric devices is not recommended.

ABOUT YOUR PRESSURE COOKER

This digitally controlled and automatic pressure cooker uses advanced technology so you and your family can enjoy the benefits of better, faster and healthier cooking. Your Elite Pressure Cooker seals in steam to cook hotter and faster while maintaining important nutrients for healthier meals. Cook fast and with less water to save vital natural resources and energy. Features include easy touch-button settings, a countdown timer, and a very large cooking pot big enough for family gatherings! It’s the easiest pressure cooker to use on the market. It may seem like a complicated unit but rest assure, this pressure cooker is simple to use, makes meals quick and easy, and overall it saves you money! Please accept our thanks for purchasing an Elite Pressure Cooker and Enjoy!

PRESSURE COOKER WITH MULTIPLE FUNCTIONS:
Multiple functions for cooking, stewing, braising, simmering, and roasting.
• Cooking will be done automatically by selecting the different menu choices on the unit. When the food has completed its cooking cycle, there will be a (3) beep indicator, followed by the unit automatically switching to the Keep Warm mode.
• This unit allows the user to choose the period of Pressurized Cooking Time (0-99 minutes) according to one’s taste and needs in addition to the Pre-Set menu.
• A Delay Timer allows the user to delay the cooking time up to 24-hours. When the timer is set, the count-down will start. By the end of the countdown, the cooker will start to heat up.
• The pressure cooker also has its own memory. Interruptions such as a power failure, automatically renew the cooking cycle where the unit left off when the power resumes.

RAPID COOKING; TIME & POWER SAVING:
• By using high pressure (high temperature), food will be cooked much more rapidly. This will reduce the cooking time and consumption of power. For example: when cooking rice, this pressure cooker will save up to 20% of the electricity and up to 15% of the time when compared to a conventional rice cooker. When cooking stew, soups or braising meats, this cooker will save more than 40% of time and more than 45% of power as compared to a conventional slow cooker. Cooking can also be done at high altitudes.

PRESERVE NUTRIENTS & PROMOTES HEALTHY EATING:
• Airtight cooking methods preserve nutrients and original flavor of food.

1. Remove packaging materials such as cardboard, plastics or Styrofoam and discard appropriately.
2. Clean all the parts by wiping with a soft damp cloth or sponge and dry thoroughly.

### LID ASSEMBLY:

1. **How to open the lid:** When the lid (2) of the cooker is at the Closed position (Figure 1), hold the Handle (1) and turn it clockwise until you reach the Opened-Lid position (Figure 2). Lift up and the lid will swing open vertically.
   **Note:** For new units, the seal of the lid may be slightly stronger than normal and may be slightly difficult to unlock. Once the lid has been opened and closed several times, it will loosen up.

2. **How to close the lid:** When the Lid (2) of the cooker is in vertical position (Figure 4), hold the Handle (1) and close it downwards at the Opened Lid position (Figure 5). Turn counter-clockwise until you reach the Closed Lid position. (Figure 6).

3. **How to dismantle the lid:** When the lid (2) of the cooker is in the upright vertical position (Figure 7), hold the lid with both hands, and adjust the height between the Lid and the upper edge of the cooker to approximately 10cm (Figure 8). Then turn it counter-clockwise until you reach the Closed Lid position (Figure 9). In order to remove the lid, you will need to move in an upward direction (Figure 10).

   - During the process of removing the lid, please ensure that the height between the lid and the upper edge of the cooker is always approximately 10cm. This is to ensure smooth movement when turning and removing the lid.
4. **How to install the lid:** Hold the Lid (2) with both hands at the Closed Lid position and pull it upwards in a slanted position to a height of 10cm between the Lid and the upper edge of the cooker (Figure 11). Align the Lid’s Sliding Latch (7) to the pressure cooker’s Lock-Slider (6) and turn it in a clockwise direction until you reach the Opened Lid position (Figure 12). The lid will be installed when the lid is seated and in the horizontal position (Figure 13).

- During the process of installing the lid, please ensure that the height between the Lid and the upper edge of the cooker is approximately 10cm. This is to ensure smooth movement when turning and installing the lid.

### PREPARING YOUR PRESSURE COOKER

1. To open the lid, hold the Handle (1) and turn it in a clockwise direction until you reach the Opened Lid position. Then pull upwards to vertical position (Figure 14 & 15).

2. Remove the inner pot (8) and place desired food and liquids into the pot. The amount of water and food should not exceed 3/4 of the height of the inner Pot (Figure 17). For food that will expand in water, the level should not exceed 3/4 of the Inner Pot. The minimum level for cooking would be 1/5 of the Inner Pot (Figure 18).

- When cooking rice, the maximum amount of rice allowed for this 8 quart pressure cooker is 16 cups of uncooked rice.
- Normally one cup of rice requires one cup of water. This may vary according to taste.

3. Be certain the inner receptacle, where the Electronic Heater is located, is clean before inserting the inner pot. Place the inner pot into the pressure cooker and adjust the pot left and right to ensure optimal contact between the Inner Pot and the Electronic Heater. (Figure 19)

### NOTES & TIPS #1:
- Please note that the Pressure Limiting Valve (3) will be loose when you are not using the unit for cooking. It will rock slightly and will turn 360° manually. Once the pressure cooker is in operation and the pressure has built up to its capacity, the Pressure Limiting Valve (3) will tighten securely, only allowing itself to be turned to the Left or Right to “Exhaust”. Once all the pressure has released, it will become loose again.

### NOTES & TIPS #2:
- During the Pressure Building process, you may notice steam or pressure escaping from the Pressure Limiting Valve (3). Carefully adjust the valve by moving it gently or turning it side to side gently using tongs or similar utensil until it seals properly.
- If any steam is escaping around the lid, it means that the Rubber Seal Ring (21) may not have completed a tight seal when the lid was locked. Cancel the cooking process, release pressure manually or naturally, remove the lid and check the Rubber Seal Ring (21). Reposition the lid and ensure that it is secure. Start the cooking process again.
OPERATING INSTRUCTIONS

HOW TO USE THE MENU SELECT BUTTONS:

There are Thirty Menu Buttons programmed for your pressure cooker. These are preset for quick and easy cooking for small portions of food in addition to manual programming. (When cooking food that is more than 3lbs. or more than 6-cups, please use the Timed Cooking function.) Each of these choices is programmed to detect the weight of food being cooked and how much liquid is inside the pot during the cooking cycle. The unit will automatically build up the pressure, cook the food and go to Keep Warm when cooking is complete.

</tbody>
</table>

1) Prepare desired food and place into cooking pot.
2) Secure the lid onto the unit, turn it Counter-clockwise to lock it properly in place.
3) Make sure the Pressure Limiting Valve (3) is set to the “Airtight” position. (Except when using the Reheat function. See Page 9 **Reheat Function).)
4) Plug the power cord into a 110-120V power outlet.
5) The LED screen will display 0.0 00.
6) Press the Menu Select Button to scroll through the Menu Selections. The Cook-Time will display for each selection. Press START once you have selected the desired Menu Function.
7) Once you press START, the LED screen will display 0.0 00.
8) When proper pressure is achieved, the LED screen will display P0 14 for cooking Beans as an example and the cook-time will begin to count down.
9) When the unit has pressurized, it will begin to pressure-couple the food. You may hear quiet hissing or sizzling sounds coming from inside of the unit during this time.
10) When cooking has completed, the pressure cooker will beep 3-times and automatically go to Keep Warm. The LED Screen will display END.
11) The Keep Warm indicator light will begin to flash/flicker. This means the Pressure Cooker is naturally releasing the pressure. This will take approximately 10-15 minutes.
12) If you wish to Quick Release the pressure, move the Pressure Limiting Valve (3) to “Exhaust” position to release the pressure until the Float Valve (5) sinks. (Figure 23a & 23b).

**CAUTION:** Keep hands and face away from Pressure Limiting Valve while in the Exhaust position. Failure to comply may cause serious injury.

13) Always be certain the pressure is released completely before unlocking the lid and opening it.
14) Remove food to serve immediately or press the Keep Warm button to keep food warm. (It's recommended to keep food warm for over 4-hours).

Continue on page 9...

**REHEAT FUNCTION**

1) The Reheat function operates at a lower temperature setting of 220°F.
2) Food should be placed inside the pressure cooker in the main cooking pot. Heat resistant containers or a trivet can be used. (Liquid is optional depending on the food type.)
3) Select REHEAT and press START. The LED screen will display P0 P
4) The pressure cooker will begin to warm, beep once and display P0 20.
5) Food will be heated for 20-minutes, and then automatically cycle to Keep Warm. The LED Screen will display END.
6) It is important to continuously observe food during the reheat cycle to prevent overcooking or burning.

**NOTE:** The Reheat function is only used for reheating foods. In order to prevent over-cooking, set the Pressure Release Valve to EXHAUST. This will prevent the lid from locking and pressure build up. Smaller quantities of food may overheat if left unattended. When using the reheat function, it is recommended to monitor the progress depending on the amount of food. Larger portions will require the maximum reheat time of 20-minutes. Whereas a smaller portion will require a shorter reheat time, and can be cancelled prior to the 20-minute maximum.

NOTES & TIPS #3:

- When cooking soups or stews with other hearty ingredients such as potatoes or meat, as much as 5 or 6 cups of liquid must be used to prevent ingredients from over-cooking or burning.

NOTES & TIPS #4:

- NATURAL RELEASE is recommended when cooking foods that will not have the tendency to overcook such as Potatoes, Beans, Soups & Stews. During the Natural Release time period (may take 10-15 minutes), the pressure cooker may still be heated and cooking the food slightly.
- QUICK RELEASE is recommended when cooking foods that you wish to be Medium or Medium-Rare such as Beef Roasts or Lamb. This will release the pressure quickly and prevent the food from over-cooking.

HOW TO USE THE “PRESSURE COOK TIME”:

Setting your own cook time is ideal for cooking meat or poultry that weighs more than 3-pound. It is also suggested for slow-cooking certain recipes that require cooking for more than 30-minutes. The programmed cook time can be set up to 99-minutes.

1) Prepare desired food and place into cooking pot.
2) Secure the lid onto the unit, turn it Counter-clockwise to lock it in place properly.
3) Make sure the Pressure Limiting Valve (3) is set to the “Airtight” position.
4) Plug the power cord into a 110-120V power outlet.
5) The LED screen will display 0.0 00.
6) Press “Pressure Cooking Time” one time, then press the MIN button to the desired time frame. (EX: If you set the cook time to 30-minutes, the LED screen will display 0.0 30).

8) The pressure cooker will begin to operate.
9) When optimum pressure is achieved, the LED screen will display P0 30.
10) When the unit has pressurized, it will begin to pressure-cook the food. The programmed time will begin to count down until it reaches zero.
11) When cooking is complete, the pressure cooker will beep 3-times and automatically go to Keep Warm. The LED Screen will display END.
12) The Keep Warm indicator light will begin to flash/flicker. This indicates the Pressure Cooker is Naturally Releasing the pressure. (See Notes & Tips #4)
HOW TO USE THE DELAY TIMER:

If you wish to program your pressure cooker to automatically cook prepared food, you can Pre-Set the pressure cooker for up to 24-hours. (*See Tip #5 “Caution”)

1) Prepare desired food and place into cooking pot.  
2) Secure the lid onto the unit, turn it Counter-clockwise to lock it in place properly.  
3) Make sure the Pressure Limiting Valve (3) is set to the “Airtight” position.  
4) Plug the power cord into a 110-120V power outlet.  
5) The LED screen will display 0.0 00.  
6) Press the DELAY TIMER button, then the HOUR button to increase the timer by 0.5-hour increments up to 10-hours, thereafter 1-hour increments (indicated on the LED screen).  
7) After choosing the desired pre-set time, choose your pre-set function or cooking time.

NOTES & TIPS #5:
- It is recommended to release the pressurized steam when the “Keep Warm” LED stops flickering as the pressure cooker will have lower pressure. This will require a little more time. (Approximately 5-10 minutes).
- During the cooking process, when the pressure cooker enters into the Pressurized Sequence, the first digit on the LED screen will display the letter “P”. At the same time, the power supply to the Heater (18) will shut off.
- For foods with a high volume of liquid (Stews, soups, porridges, etc.) IT IS NOT RECOMMEND TO USE QUICK RELEASE. This is to avoid liquid splatter from the ventilation in the Pressure Limiting Valve (3).
- Use the NATURAL RELEASE: User should wait for the temperature to drop and the Float Valve to sink on its own prior to opening the lid.

*CAUTION: It is not recommended to use the Pre-Set Timer function to cook foods that may spoil. Leaving raw foods inside the pressure cooker for long periods of time prior to cooking may result in the food spoiling.

Cook food that can be left out such as rice, beans, grains or other foods that will not spoil.

HOW TO USE THE KEEP WARM FUNCTION:

Food can be prepared at an earlier time and kept warm inside the pressure cooker using the Keep Warm function. It is not recommended to keep food warm for over 4-hours. Additional time may cause a change in flavor, appearance and cause food to spoil.

1) Prepare desired food and place into inner pot.  
2) Secure the lid onto the unit and turn it Counter-clockwise to lock it in place properly.  
3) It is recommended to set the Pressure Limiting Valve (3) to “Exhaust” at this time since you are only keeping food warm and not pressurizing.  
4) Press the Keep Warm button.  The indicator light will illuminate solid.  It should not be blinking.  
5) The pressure cooker will start maintaining a lower temperature to keep warm.  
6) To cancel, simply press the KEEP WARM/CANCEL button until indicator light is no longer illuminated.  
7) Remove food and serve.  
8) Unplug power cord and allow to cool completely before dismantling and cleaning.

How to Cook with Frozen Foods:

Cooking frozen food inside a pressure cooker is quick and easy but has certain restrictions. Only cook individual cuts of frozen meats that are up to 1 inch thick, the cooking time does not need to be altered. Pressure will not be achieved until the internal temperature has reached a preset level. If the recipe states the meat be cooked for 10 minutes after pressure has been achieved, it will still be the same, but will take longer to come to the pressure point.

It is not recommended to pressure cook larger cuts of frozen meats such as a whole roast, a block of frozen ground meat or a whole chicken. Larger cuts will require increased cooking times of up to one third more, and the results may not be the same when compared to meats that were thawed (or at least partially thawed) and browned before cooking.

HOW TO BROWN/SAUTÉ INSIDE THE PRESSURE COOKER:

Certain recipes suggest that you brown meat or sauté vegetables to ensure juices are retained during cooking. It also provides nice coloring when meat or vegetables are cooked and ready to serve.

To brown or sauté:
1. Open and/or remove the lid depending on your preference.  
2. Select the BROWN RICE menu setting and press START to manually begin the heating process.  
3. Put food into the Inner Pot (8) and cook to brown or sauté to desired consistency.

NOTES & TIPS #6:
- During Browning/Sautèing, the pressure cooker will automatically set itself to Keep Warm when it reaches a high temperature. (Approximately 5-minutes). If you are browning/sautéing a large quantity of food, you may need to allow the unit to cool slightly for 1-2 minutes before pressing START again. It is possible that the internal sensor will prevent any other buttons from activating to avoid over-heating.

4. When ready to start the pressurized cooking cycle: Press the CANCEL button to cancel the browning/sautéing process.  
5. Close the lid and secure properly.  
6. Follow the instructions on cooking to your preference.
HOW TO USE THE PRESSURE COOKER FOR CANNING:

It is recommended to purchase a separate instructional book that is specific to Canning. These books can be purchased at a local book store. This pressure cooker can be used to do basic pressure canning and the water-bath method. Low-Acidic fruits and vegetables and High-Acidic fruits and vegetables are recommended. It is not recommended to can foods such as meat or seafood products in this unit. It is also not recommended to use this pressure cooker for canning at high or low altitudes.

Before using this unit for canning purposes, check with the USDA for food preservation guidelines or read the publications listed at [http://www.uga.edu/nchfp/publications/publications_usda.html](http://www.uga.edu/nchfp/publications/publications_usda.html)

- Always use canning supplies specifically manufactured for canning purposes. It is recommended to use mason jars that are 32-ounces or smaller. Do not stack jars on top of each other. This pressure cooker can hold up to 3 x 32oz. jars OR 4 x 16oz. jars at a time.
- Always inspect your canning supplies to ensure proper function and safety. Avoid using jars with chips, nicks, cracks or other imperfections in the glass, rims or lids.
- Wash jars thoroughly in hot water according to manufacturer’s instructions.
  - Always make sure there is 1-inch of headspace in the jars.
  - Use a thin utensil to release any trapped air between the food and the jar by pressing food firmly to the sides to dislodge any air bubbles.
  - Set jar lids onto the jar and screw on the outer rings until tight, then unscrew ¼ turn.
- Place jars into the inner pot.
- If desired, use clean dish towels to tuck around the jars to prevent them from touching each other or the sides of the inner pot.
- Fill inner pot with 6-cups of water. (Certain canning recipes may require a different amount of water.)
- Secure the lid onto the pressure cooker, turn it Counter-clockwise to lock it in place properly.
- Make sure the Pressure Limiting Valve (3) is set to the “Airtight” position.
- Plug the power cord into a 110-120V power outlet.
- Follow canning recipe for the type of food you are canning and program the “Pressure Cooking Time” for the specified time frame for the size of jars and type of food recipe you are using. (EX: If you set the cook time to 30-minutes, the LED screen will display **0.0 30**)
- Press Start.
- The pressure cooker will begin to operate.
- When pressurization has been achieved, the LED screen will display **P 0 30**
- When the unit has reached optimum pressure, it will begin to pressure-seal the mason jars. The programmed time will begin to count down until it reaches zero.
- When time has expired, the pressure cooker will beep 3-times and automatically go to Keep Warm.
- The Keep Warm indicator light will begin to flash/flicker. This indicates the Pressure Cooker is proceeding to Naturally Release the pressure. (See Notes & Tips #5)
- Open lid once pressure has completely released which is indicated by the Keep Warm indicator light staying illuminated.
- Carefully remove jars using special canning utensils or tools. **CAUTION:** Jars are hot!
- Set jars on a towel or cooling rack and allow to cool completely in a draft-free location.
- Follow recipe instructions on cooling and storage.

**NOTES & TIPS #7:**
- While the jars are cooling, a small “click” sound will come from the lids to indicate the lids are sealing properly.
- After approximately one hour, check to be sure the flat lids have obtained a good seal by pressing down with your thumb; the lid should remain stiff with no movement.
- If you have not achieved a good seal within 2 hours, the canning did not work properly and the ingredients will need to be refrigerated and used within 3 days or frozen in a freezer container.
FAQ (FREQUENTLY ASKED QUESTIONS)

1) Is the Airtight/Exhaust Valve Knob on the top of the lid supposed to be loose?
   - If you are not cooking or using the unit, the Valve Knob will be loose. It will turn 360
     degrees and may even come off if you pull on it. Once you start using the pressure cooker
     and the pressure has built up, and the Valve Knob is set to “Airtight” properly, it will not be
     loose anymore.
   - Sometimes during cooking and pressurizing, steam may escape from the Valve. It
     indicates the Valve is not seated properly/securely. Simply use tongs or similar utensil and
gently/carefully adjust it so it is seated properly.

2) When I choose a Menu Button (ex: Meat & Chicken), nothing happens? What’s wrong?
   - Nothing is wrong.
   - Make sure the Valve on top is set to Airtight and the lid is locked securely. Once you have
     selected the Menu Button, simply leave the unit alone and it will start to heat up and build
     up pressure. This sometimes may take up to 5-10 minutes depending on what you’re
     cooking.
   - Once the unit has built up enough pressure, the red display will change to a letter “P”. This
     is the time the unit will start cooking the food. This may take up to 5 minutes.
   - The unit will then start to cool down and de-pressurize on its own. It will beep 3 times.
     The “P” will turn back to a “0” and the Keep Warm light will begin to blink.
   - During this time, the food inside is still cooking. Depending if you want your food to be
     cooked longer, you can allow the unit to naturally release the pressure by letting the unit sit.
     (Some meats will keep cooking once the pressure is released, so if you prefer your meat to
     be Medium or Medium-Rare, we suggest the quick release.)
   - Once the pressure has completely released, the floating valve will drop down. You can
     unlock the lid and open to check on your food.

3) What is the little black plastic piece that came in the accessory bag?
   - This is part #15 on the instruction manual. Some may think it is part #7, but it is not. It is
     the spatula/spoon holder that latches onto the side of the pressure cooker. Refer to the
     instruction manual for the parts indicator to determine the location of where to attach #15
     part.

4) When I set the pressure cooker using the Manual Pressure Cooking time OR the
    Preset Menu Buttons, it will begin to build pressure heat up, but in about 5-minute the
    unit beeps 3 times and goes to Keep Warm and my food did not cook completely.
    What is happening?
    - The unit is sensing that there is a leak in the pressure and that it is not sealed up properly.
      Check the unit thoroughly. Make sure the rubber gasket ring is in place, the lid is securely
      locked, and that the Valve on top of the lid is set to the “Airtight” position. Reset the unit by
      unplugging it. Wait 10-seconds and plug it back in. Program the unit again.
    - Another reason this may happen is that not enough liquid has been added to your recipe.
      The pressure cooker has an automatic over-heat prevention sensor that will automatically
      set itself to OFF or to Keep Warm when it senses that no liquid is present so it does not
      over-heat.

5) Steam is being released around the rim of the lid during the pressurizing sequence.
    How do I fix this?
    - The Rubber Sealing Ring did not make a proper seal. Cancel all the functions. Exhaust
      any remaining pressure and steam. Open the lid and remove it entirely. Check the
      Rubber Sealing Ring to make sure it is positioned properly. Rub a wet cloth along it to
      make sure it is clean of debris and it is smooth. Re-assemble the lid, lock it securely in
      place and restart the cooking process.

6) Steam is being released from the Pressure Limiting Valve during the pressurizing
    sequence. How do I fix this?
    - The Valve may not be positioned properly. Simply use tongs or similar utensil or oven mitt
      and carefully adjust it so it is seated properly. If the steam continues to release, you may
      need to Cancel all the functions. Exhaust any remaining pressure and steam. Remove
      the Pressure Limiting Valve and check the thin wire spring on the underside of it. Make
      sure it is not bent or loose. If steam still continues to escape, the Valve may be faulty and
      replacement or repair may be necessary. Please contact the manufacturer.

7) Pressurized Steam is being quietly released from the Floating Valve area during the
    pressurizing sequence. How do I fix this?
    - This may happen during the initial start-up of the Pressurizing Sequence. Simply use

**COOKING TIME CHART**

*Courtesy of www.healthfoods.com*

Please note that all the below information is for your reference only and can be adjusted according to the user’s preference.

**Meat/Poultry**
- Always cook meat or poultry with at least 1-3 cups of liquid. If the cooking time exceeds 15 minutes, use 2 cups of liquid. If weight of meat or poultry is 3lbs, use 3 cups of liquid. Preserved or salted meats should be immersed in water.
- Cooking times for meat and poultry may vary according to the quality and quantity of meat or poultry being cooked.
- Unless indicated, the cooking times given below are for 3 pounds of meat or poultry unless noted otherwise. Additionally, the denser the cut, the longer the cooking time should be.

<table>
<thead>

</tbody>
</table>

**Seafood**
- Cooking times may vary according to the type of seafood being cooked.
- Cook seafood on a cooking rack with a trivet on the bottom of the pot (if available), and add at least 3/4 cup of liquid. Lightly grease cooking rack with vegetable oil when cooking fish.

<table>

*Split peas and rhubarb can foam, froth, and sputter, and can clog the pressure release device (steam vent). These foods should not be cooked in a pressure cooker.*
Dried Beans and Other Legumes

- Place beans or legumes in pressure cooker. Add 3 cups of water for each cup of beans or legumes.
- Add 1 tablespoon of vegetable oil for each cup of water to cut down on foaming. Do not add salt until after cooking.
- Let pressure drop naturally after cooking.
- Cooking times may vary according to the quality of the beans or other legumes. If still hard after recommended cooking times, continue cooking uncovered. Add additional water, if necessary. (Below chart is for quantity approximately half a pot).

* Applesauce and cranberries, can foam, froth, and sputter, and can clog the pressure release device (steam vent). These foods should not be cooked in a pressure cooker.

Grains

Before cooking, soak certain grains, such as wheat berries and pearl barley in four times their volume of lukewarm water for at least four (4) hours or overnight if required. Do not add salt to water, since it may toughen the grains and inhibit hydration.

- Do not soak rice.
- Rinse under lukewarm water (this also applies to rice)
- Cook each cup of grain in the amount of water specified.

<table>

* Pearl barley, oatmeal or other cereals can foam, froth, and sputter, and can clog the pressure release device (steam vent). These foods should not be cooked in a pressure cooker.
**LEEK & ASPARAGUS RISOTTO**
SERVES 4 - 6

**Ingredients**
- 1 1/2 tablespoons olive oil
- 1 1/2 tablespoons butter
- 1 1/2 tablespoons water
- 2 garlic cloves, minced
- 1 1/2 cups leeks, sliced
- 1 1/2 cups Arborio rice
- 4 cups vegetable broth
- 1/4 lb asparagus, chopped into 1 inch segments
- 1 1/4 cups parmesan cheese, shredded

**Directions**
- In the pressure cooker, heat the olive oil and butter. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Add the garlic and leeks, sauté until soft.
- While risotto cooks, steam asparagus in water. Then sauté in olive oil. Season with salt and pepper.
- When risotto is done cooking, follow instructions to reduce pressure, then add the sautéed asparagus, and Parmesan cheese.
- Serve immediately.

---

**BEEF IN PEPPER SAUCE**
SERVES 4

**Pepper Sauce**
- 1 red bell pepper or green bell pepper
- 1/2 cup baby carrot
- 2 garlic cloves
- 1 teaspoon turmeric
- 1 teaspoon salt
- 1/2 teaspoon black pepper
- 1/2 teaspoon ground cardamom

**Remaining Ingredients**
- 2 tablespoons olive oil
- 2 lbs boneless sirloin steaks, cut into strips
- salt & pepper
- 1 cup water
- 1/2 teaspoon paprika
- 1/2 teaspoon cumin
- 1/2-1 onions, sliced
- 1 green bell pepper, sliced

**Directions**
- Remove 1 tablespoon of tomato sauce from the can to be used later. Then blend the ingredients for the pepper sauce (green pepper through cardamom) in a food processor until there are no chunks left. Set aside.
- Pour the oil into the pressure cooker, sprinkle the beef with salt & pepper then brown over heat. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Once brown add the water, reserved tomato sauce, paprika & cumin. Close the lid and press the MEAT & CHICKEN function switch.
- When meat is done, follow instructions to reduce pressure.
- Add the pepper mixture, sliced onions & green peppers to the meat and sauce, cover with lid and press the MEAT & CHICKEN function again.
- When cooking is complete, follow instructions to reduce pressure.
- Vegetables should be tender. Serve immediately.

---

**CHICKEN PICCATA**
SERVES 6

**Ingredients**
- 6 chicken breast halves
- 1/2 cup all-purpose flour
- 1/4 cup sour cream
- 4 shallots
- 3/4 cup chicken broth
- 1 lemon, thinly sliced, to garnish
- 1/3 cup fresh lemon juice
- 1 teaspoon dried basil
- 1 tablespoon sherry wine
- 2 teaspoons salt
- 1/4 teaspoon white pepper
- 1 cup pimento stuffed olive, minced
- 1/4 cup sour cream
- 1 tablespoon potato starch or flour
- 1/4 cup fresh parmesan cheese, grated (1 ounce)
- fontinella cheese, grated
- 1 lemon, thinly sliced, to garnish
- 1 teaspoon dried basil

**Directions**
- Lightly dust chicken pieces with flour.
- In pressure cooker, heat oil. Add chicken breasts, two at a time, and sauté in hot oil until brown on all sides. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Set aside when finished. (Follow the Browning/Sautéing instructions on page 11 of this manual.)
- Add shallots and garlic to pressure cooker and sauté in oil, scraping bottom of pan to loosen browned particles remaining from chicken. Stir in broth, lemon juice, sherry, salt, pepper, basil, and olives. Mix well.
- Add chicken pieces skin side down back into the pressure cooker with other ingredients.
- Close the lid and press the MEAT & CHICKEN function switch.
- When cooking is complete, follow instructions to reduce pressure.
- Lift lid. Stir chicken mixture, then transfer just the chicken to serving platter, and cover to retain heat.
- Whisk sour cream and starch together. Stir into cooking liquid inside the pressure cooker and cook over manual heat 1 minute, stirring constantly.
- Spoon sauce over chicken. Sprinkle with cheese and garnish with lemon slices.

ITALIAN POTATO, RICE, & SPINACH SOUP
SERVES 6

Ingredients
1/4 cup olive oil
6 leeks, white part only, sliced
3 garlic cloves, crushed
2 carrots
1/2 cup Arborio rice
3 potatoes, cut in large chunks
5 cups chicken stock
1/2 cup parsley, chopped
1/2 cup celery, chopped
1 bay leaf
1 teaspoon salt
1/4 teaspoon pepper
2 teaspoons dried basil
2 tablespoons fresh lemon juice
2 tablespoons tomato paste
1 tablespoon light brown sugar
10 ounces fresh spinach, rinsed, cut in large pieces
1/4 cup parmesan cheese, grated
1/4 cup fontinella cheese, grated
2 tablespoons tomato paste
1 tablespoon light brown sugar
1/2 cup parsley, chopped
1/2 cup celery, chopped
1/2 cup parsley, chopped
1/2 cup celery, chopped
1/2 cup parsley, chopped
1/2 cup celery, chopped
1/2 cup parsley, chopped
1/2 cup celery, chopped
1/2 cup parsley, chopped
1/2 cup celery, chopped
1 bay leaf
1 teaspoon salt
1/4 teaspoon pepper
2 teaspoons dried basil

Directions
- In the pressure cooker, heat oil. Add leeks, garlic, and carrots and sauté in hot oil 2 minutes. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Add rice and potatoes. Stir well and cook 1 minute.
- Add broth, parsley, celery, bay leaf, salt, pepper, basil, lemon juice, tomato paste, and brown sugar. Stir well.
- Secure lid. Press the POTATOES & YAMS function switch. Cooking should be approximately 15-20 minutes.
- Lift lid. Ladle the soup into large serving bowl or individual bowls. Combine the cheeses and sprinkle over soup. Serve with hunks of Italian bread.

TUSCAN LAMB SHANK
SERVES 5

Ingredients
3/4 cup dried great northern beans
3 1/4 cups water, divided
3 lbs lamb shanks (about 2 large shanks)
2 tablespoons all-purpose flour
1/2 teaspoon salt
1/2 teaspoon fresh ground black pepper
2 teaspoons olive oil, divided
1/2 cup shallot, sliced
6 garlic cloves, sliced
1 cup dry red wine
1/4 cup sun-dried tomato
1 teaspoon dried rosemary
1 tablespoon Worcestshire sauce
1 (14 1/4 ounce) can low sodium beef broth
2 tablespoons flat leaf parsley, chopped
5 cups egg noodles, hot cooked (about 4 cups uncooked pasta)

Directions
- Sort and wash beans; combine with 3 cups water in a small saucepan. Bring to a boil; cook 1 minute. Remove from heat. Let stand 20 minutes. Drain; set aside.
- Trim fat from lamb. Place flour, salt, and pepper in a large zip-top plastic bag; add lamb. Seal; shake to coat. Remove lamb from bag; shake off excess flour mixture. Reserve 1 1/2 teaspoons flour mixture, and set aside. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Heat 1 teaspoon oil in the pressure cooker over heat. Brown the lamb shanks one by one. Let cook for 8-minutes on each side for Medium doneness. Remove lamb and set aside.
- Add shallots and garlic to the pressure cooker, and sauté 2 minutes using the Browning/Sautéing instructions on Page-11 of this manual.
- Add the beans, 1/4 cup water, reserved 1 1/2 teaspoons flour mixture, red wine, and the next 4 ingredients (wine through broth).
- Close the lid and press the BEANS & GRAINS function switch.
- During cooking of the sauce, go back to the lamb that was set aside. Remove lamb meat from bones; discard bones, fat, and gristle.
- When the sauce is finished cooking, follow instructions to reduce pressure.

CHICKEN ADOBO
SERVES 4 - 5

Ingredients
8-9 chicken thighs
2 cups water
2 cups low sodium soy sauce
1 large onion (cut into rings)
8 garlic cloves, chopped
1/2 cup shallot, sliced
2 bay leaves
2 tablespoons cooking sherry
1 teaspoon ground black pepper
3 tablespoons molasses
1 cup olive oil
Jasmine rice

Directions
- In the pressure cooker, heat olive oil over heat. Brown the chicken thighs on both sides. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Remove and set aside.
- In pressure cooker, combine water, soy sauce, onion, garlic, bay leaves, sherry wine, black pepper and molasses.
- Add the chicken to the sauce. Stir a bit to get the chicken thighs down into the liquid.
- Close the lid and press the MEAT & CHICKEN function switch.
- Use this time to cook some jasmine rice.
- When cooking is complete, follow instructions to reduce pressure.
- Lift lid. Remove the bay leaves. Serve chicken and sauce over jasmine rice.

SPARE RIBS
SERVES 6 - 8

Ingredients
1 cup brown sugar
1/4 cup soy sauce
1/2 teaspoon paprika
1 tablespoon vinegar
1/4 teaspoon cayenne
1 teaspoon garlic powder
2 lbs pork ribs
1 cup of chicken/beef stock

Directions
- Prepare sauce ingredients inside inner pot.
- Divide ribs up evenly so it fits into the pressure cooker.
- Coat each piece thoroughly with the sauce.
- Place all ribs into pressure cooker pot after coating with sauce.
- Add the 1 cup of stock to the bottom of pot.
- Close the lid, lock and press the MEAT & CHICKEN function switch.
- When cooking is complete, use the Quick or Natural release method and remove the lid.
SOUTH OF THE BORDER SPICY CHILI
SERVES 6

Chili is a nutritionally sound and complete meal. You can make it more or less fiery by adjusting the amount of chili powder used.

<table>
<thead>
<tr>
<th>Ingredients</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2 tablespoons olive oil</td>
<td></td>
</tr>
<tr>
<td>2 medium onions, chopped</td>
<td></td>
</tr>
<tr>
<td>3 garlic cloves, minced</td>
<td></td>
</tr>
<tr>
<td>1 1/2 lb ground beef</td>
<td></td>
</tr>
<tr>
<td>2 teaspoons ground cumin</td>
<td></td>
</tr>
<tr>
<td>2 tablespoons chili powder, or to taste</td>
<td></td>
</tr>
<tr>
<td>1 1/2 teaspoons oregano</td>
<td></td>
</tr>
</tbody>
</table>

Garnishes
Grated cheddar or Monterey Jack cheese
Finely chopped onion
Shredded lettuce

Directions:
- Heat the oil in the pressure cooker and sauté the onion and garlic until the onion is wilted.
- Add the beef and cook until it is browned. Mix the cumin, chili powder, oregano, bay leaf, celery seed, salt and flour. Stir in the crushed tomato and beef stock. Add beans.
- Lock the lid in place and press the SOUP & STEW button. When cooking is complete, use the Quick release method and remove the lid. Serve in bowls, passing the garnishes separately.

TRADITIONAL MEAT LOAF
SERVES 4

Ingredients
1 1/2 lb mixture of chopped or ground lean beef, pork and veal
1 teaspoon salt
Freshly ground pepper
2 slices bread, soaked in water and squeezed dry
2 tablespoons parsley
1 medium onion, minced
1 garlic clove
1 egg
2 tablespoons chicken stock
2 teaspoons Worcestershire sauce
2 tablespoons olive oil
1 cup tomato sauce
1 cup water

Directions:
- In a bowl, combine the chopped meat, salt, pepper, bread, parsley, onion, garlic, egg, chicken stock and Worcestershire sauce. Shape into two small loaves. Wrap in wax paper and chill several hours to firm. Heat the oil in the pressure cooker and brown the loaves well on all sides. (Follow the Browning/Sautéeing instructions on Page-11 of this manual.)
- Remove the oil and combine the tomato sauce and water, and season with salt and pepper. Spread the ketchup over the meat loaves and lower the oven-safe dish into the pressure cooker.
- Lock the lid in place and press the MEAT & POULTRY button. When cooking is complete, use the Quick or Natural release method and remove the lid. Serve with rice if desired.

SWEET-SOUR BEEF SPARERIBS
SERVES 4

Ingredients
3 tablespoons vegetable oil
3 lb lean short spareribs cut into serving pieces

Sweet-Sour Sauce Ingredients
3 tablespoons soy sauce
2 tablespoons brown sugar
3 tablespoons honey
3 cloves garlic, minced
1/4 cup ketchup
1 teaspoon hot pepper sauce, or to taste

Garnishes
Grated cheddar or Monterey Jack cheese
Finely chopped onion
Shredded lettuce

Directions:
- In a small bowl combine all the sauce ingredients. Heat the oil in the pressure cooker until very hot, add as many ribs as at a time as will comfortably fit, and brown well. Pour off all fat, and then stir in the sauce. (Follow the Browning/Sautéeing instructions on Page-11 of this manual.)
- Lock the lid in place and press the MEAT & POULTRY button. When cooking is complete, use the Quick or Natural release method and remove the lid. Serve with rice if desired.

JAMBALAYA
SERVES 4-6

Ingredients
1 tablespoon vegetable oil
1/2 lb boneless skinless chicken breasts, cut into 1" pieces
1/2 lb fully cooked Andouille or Italian sausage, sliced
1/2 lb uncooked shrimp, peeled and deveined
2 teaspoons Creole seasoning
1 teaspoon dried thyme leaves
1/8 teaspoon cayenne pepper
1 onion, chopped
3 garlic cloves, minced
1 green bell pepper, chopped
3 stalks celery, sliced
1 cup long grain rice
16 oz canned chopped tomatoes, un-drained
1 cup chicken stock
3 tablespoons fresh parsley, minced

Directions:
- Heat oil in the pressure cooker. Add chicken, sausage and shrimp. Sprinkle meats with half of the Creole seasoning, half the thyme and half the cayenne. Cook for 3-5 minutes uncovered, stirring frequently, until chicken and shrimp are thoroughly cooked. Remove chicken, sausage and shrimp with a slotted spoon and set aside. (Follow the Browning/Sautéeing instructions on Page-11 of this manual.)
- Add chicken, sausage, shrimp and tomato sauce, and remaining Creole seasoning, thyme and cayenne to pressure cooker. Cook for 4-5 minutes, stirring frequently. Add chicken, sauce, shrimp and rice, tomatoes with their juice and stock. (Follow the Browning/Sautéeing instructions on Page-11 of this manual.)
- Lock the lid in place and press the SOUP & STEW button. When cooking is complete, use the Quick or Natural release method and remove the lid. Serve with rice if desired.
CORNISH HENS BRAISED IN WHITE WINE
SERVES 4

Ingredients
- 2 tablespoons olive oil
- 2 Cornish hens, trussed
- 1/2 teaspoon salt
- 1/4 teaspoon freshly ground black pepper
- 1/2 teaspoon thyme
- 1/2 teaspoon basil
- 1 tablespoon minced parsley
- 1 tablespoon flour
- 1/2 cup dry white wine
- 1/2 cup chicken stock
- 1/4 lb mushrooms, cleaned and sliced

Directions:
- In the pressure cooker, heat the olive oil and brown the Cornish hens on all sides. Sprinkle them with salt and pepper, thyme, basil and parsley. Stir in the flour, and then pour in the wine and stock. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Lock the lid in place and program to cook for 40-minutes. When cooking is complete, use the Quick or Natural release method and remove the lid. Serve with rice or a salad if desired.

ORANGE-FLAVORED CANDIED YAMS
SERVES 4

Ingredients
- 1 cup orange juice
- 2 large sweet potatoes (yams)
- Salt, to taste
- 1/2 cup brown sugar
- 1 teaspoon grated orange zest
- 2 tablespoons butter

Directions:
- Pour the orange juice into the pressure cooker. Peel the sweet potatoes and cut them in half lengthwise. Arrange in a pressure cooker steamer basket (if available) and sprinkle with salt, brown sugar and orange zest. Dot with butter.
- Lower the steamer basket into the pressure cooker. Lock the lid in place and press the POTATOES & YAMS. When cooking is complete, use the Quick or Natural release method and remove the lid.
- Lift out the sweet potatoes. Boil down the sauce until thickened and pour over the sweet potatoes.

TORTILLA SOUP
SERVES 8-10

Ingredients
- 1/3 cup vegetable oil
- 2 onions, diced
- 4 cloves garlic, peeled
- 1 can tomatoes, drained
- 3 quarts chicken broth
- 2 Cups Cooked Shredded Chicken
- Tortilla chips
- cilantro, chopped
- 1 lb grated cheese
- lime wedges (optional)

Directions:
- Sauté onions and garlic in the oil in the pressure cooker until they are deep golden brown. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Remove from unit and purée with tomatoes in blender or food processor until smooth.
- Return to pressure cooker and add broth. Heat to boiling.
- Lock the lid in place and press the SOUP & STEW button. When cooking is complete, use the Quick or Natural release method and remove the lid.
- Add cilantro and salt to taste. Place cheese and tortilla chips in individual soup bowls and pour hot soup on top. Serve with lime wedges, if desired.

OLD FASHIONED RICE PUDDING
SERVES 4

It's preferable to eat it the same day or the rice may become chewy.

Ingredients
- 1 tablespoon butter
- 1/4 cup long grain rice
- 2 cups milk
- 1/3 sugar
- 1/2 teaspoon salt
- 1 egg
- 1/4 cup evaporated milk
- 1/2 teaspoon vanilla
- Cinnamon

Directions:
- Melt the butter in the pressure cooker and stir in the rice, coating it with the butter. Pour in the fresh milk and water, and then stir in the sugar and salt. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Lock the lid in place and program to cook for 10-minutes. When cooking is complete, use the Quick or Natural release method and remove the lid.
- In a small bowl mix together the egg, evaporated milk and vanilla. Stir in a little of the hot liquid from the pressure cooker, then add the mixture to the pressure cooker.
- When cooking is complete, use the Quick or Natural release method and remove the lid.
- Cover again and set to cook for 5 more minutes.
- When cooking is complete, use the Quick or Natural release method and remove the lid.
- Cool 10 minutes, stirring occasionally.

Transfer to individual dessert bowls, continue cooling, then refrigerate. Serve sprinkled with cinnamon.

SPICED APPLE CRUNCH
SERVES 3

Ingredients
- 1 cup dry bread crumbs (unseasoned)
- 1 lemon (juice and rind)
- 3 apples, sliced
- 1/4 cup sugar
- 1/4 cup butter, melted
- 1/2 teaspoon cinnamon
- 2 cups water

Directions:
- Butter a 15 cm (6") baking dish. Combine bread crumbs (or graham wafer crumbs), sugar, cinnamon, juice and lemon rind. Place alternate layers of apples and crumbs in baking dish. Pour melted butter over ingredients and cover baking dish firmly with aluminum foil.
- Place water, trivet, and then baking dish in pressure cooker.
- Lock the lid in place and program to cook for 20-minutes. When cooking is complete, use the Quick or Natural release method and remove the lid.
- If you wish to add more color and crunch, run the dish quickly under the broiler. Be sure to watch carefully to prevent burning.
PEARS STEWED IN RED WINE
SERVES 4
A most elegant dessert when served with raspberry sauce. A fine ending to a special dinner.

- 2 cups water
- 1/2 cup sugar
- 2 slices lemon
- 2 cinnamon sticks
- 1/4 teaspoon mace
- 4 firm pears, peeled but not cored, stems on
- 3/4 cup red wine
- 1 cup frozen raspberries
- 4 tablespoons heavy cream

Directions:
- In the pressure cooker, combine the water, sugar, lemon, cinnamon sticks and mace. Simmer until the sugar is dissolved. (Follow the Browning/Sautéing instructions on Page-11 of this manual.)
- Place the pears into the pressure cooker, trimming bottoms if necessary so they stand upright.
- Lock the lid in place and program to cook for 10-minutes. When cooking is complete, use the Quick or Natural release method and remove the lid.
- Add the red wine.
- Lock the lid in place again and program to cook for 10 more minutes. When cooking is complete, use the Quick or Natural release method and remove the lid.
- Carefully remove only the pears and transfer to a deep container.
- Boil down the remaining sauce until it is syrupy by pressing START. Cool, then pour over the pears and keep at room temperature overnight.
- To serve, defrost and purée the raspberries in a processor until smooth.
- Spoon 4 tablespoons of the purée on four dessert dishes or shallow bowls. Place a pear upright in the center of each dish. Spoon some syrup over the pears.
- Dribble 1 tablespoon of cream in a circle over the sauce. With the aid of a knife, swirl the cream into the sauce in an attractive design.

CINNAMON APPLE FLAN WITH MAPLE SYRUP
SERVES 6

Ingredients
- 5 tablespoons maple syrup
- 1/4 teaspoon cinnamon
- 2 apples, peeled and cut in 1/4" slices
- 3 whole eggs
- 3 egg yolks
- 1/4 teaspoon vanilla
- 6 tablespoons sugar
- 2 1/2 cups milk

Directions:
- In a small saucepan, combine the maple syrup and the cinnamon. Add the apple slices and slowly simmer until the apples are tender.
- Divide the mixture into 6 greased oven-safe custard cups. In a large bowl, whisk the eggs and egg yolks. Stir in the vanilla, sugar and milk. Pour this mixture slowly into the custard cups. Cover tightly with foil.
- Fill the pressure cooker with 2 1/2 cups water. Place as many custard cups as will fit in the pressure cooker steamer basket (if available) and lower into the pressure cooker.
- Lock the lid in place again and program to cook for 10 more minutes. When cooking is complete, use the Natural release method and remove the lid.
- Remove the lid, take out the basket, loosen the foil and cool the custard.
- Refrigerate. To serve, loosen the custard from the molds with a knife and invert onto dessert dishes.
