Slice 'N Dice™

FAQ

Q: How many cutting functions does the Slice 'N Dice™ have?

- A:** The Slice 'N Dice™ has five cutting functions and four blades and each cutting function is color coded for simple use.
- The externally adjustable slicing function helps you effortlessly slice your favorite fruits and vegetables.
 - The commercial-style dicing disc creates precise cubes for professional quality dicing in your own home.
 - The dual-sided julienne disc is the first of its kind! Now you can take the difficulty out of julienne slicing and create perfect thick or thin strips using the Slice 'N Dice™.
 - The dual-sided shredding and grating disc easily shreds or grates all of your ingredients without the hassle of doing it by hand.

Q: Please explain the Externally Adjustable Slicing System

- A:** With the Slice 'N Dice™ you no longer need to remove and replace a disc in order to change the thickness of your slicing. Now you can effortlessly adjust the thickness of your slices using the externally adjustable slicing system! Just turn the green knob on the outside of the lid and the Slice 'N Dice™ will change the thickness for you.

Q: How many thicknesses can I make using the Externally Adjustable Slicing System?

- A:** There are 9 thickness settings from 1mm – 5mm.

Q: Please explain the dicing feature

- A:** The Slice 'N Dice™ dicing feature is the first compact commercial-style dicer on the market! Just put your ingredients into the feed chute and the Slice 'N Dice™ will automatically dice 8mm cubes. The Slice 'N Dice™ also includes a dicing cleanout tool, ensuring that you get the most out of your dicing while also making clean up easy.

Q: What size can I make using the dicing feature?

- A:** The precision dicing system allows you to create precise 8mm (1/4" x 1/4") cubes for professional quality dicing results at home.

Q: Can I shred with the Slice 'N Dice™?

- A:** Yes, the Slice 'N Dice™ comes with a dual-sided shredding and grating disc.

Q: What can I make with the Dual-Sided Julienne Disc?

- A:** The dual-sided julienne disc easily and quickly cuts long, thin strips with two different thickness options. Common items to julienne are carrots, potatoes, apples, zucchini, and cucumbers. Julienne strips are often used to make salads, stir fries, French fries, hash browns, desserts and more!

Q: Does the Slice 'N Dice™ come with any workbowls?

- A:** No workbowls are included with the Slice 'N Dice™, but with the continuous flow chute any bowl, plate or pan can be used to catch your sliced and diced ingredients.

Q: What are the advantages to the continuous flow chute?

- A:** With the continuous flow chute, you no longer need to stop your cutting or slicing to empty a full food processor bowl. You can process directly into your own bowl or pan with no capacity limitations.

Q: How wide is the continuous flow chute?

- A:** The continuous flow chute is 3" wide.

Q: How large is the feed chute on the Slice 'N Dice™?

A: The feed chute is 3" wide and 2" long to fit most produce with less prep work!

Q: How many ingredients can I cut at a time?

A: The Slice 'N Dice™ continuous flow chute allows you to cut as many ingredients as you need to without emptying a food processor bowl. As long as the ingredients you are cutting fit into the feed chute, your slicing and dicing options are endless.

Q: Are the discs and blades dishwasher safe?

A: Yes, all removable parts of the Slice 'N Dice™ are dishwasher safe, making clean-up a breeze.

Q: Is a storage unit included for the discs and blades?

A: Yes, there is a convenient and compact storage case for all removable parts of the Slice 'N Dice™.

Q: Does this product come with a warranty?

A: The Slice 'N Dice™ has a three year limited warranty.

Q: What ingredients work best with the Slice 'N Dice™?

A:	Adjustable Slicing Disc	Dicing Disc	Shred/Grate Disc	Julienne Disc
	Apples	Peppers	Firm Cheeses	Peppers
	Potatoes	Potatoes	Potatoes	Onions
	Tomatoes	Tomatoes	Cabbage	Cucumbers
	Cucumbers	Onions	Cucumbers	Carrots
	Carrots	Cucumbers	Carrots	
		Carrots		

Q: How do I know if my Slice 'N Dice™ is ready to use?

A: The Slice 'N Dice™ is built with your safety in mind. The Slice 'N Dice™ will not operate until everything is properly assembled. Simply twist the basin onto the motor base, install your preferred cutting disc, and twist to lock the lid in place. Plug in the appliance and you are ready to begin processing!

Q: Do you have to hold the Slice 'N Dice™ while it's running to prevent it from moving?

A: No, the suction cups on the bottom of the Slice 'N Dice™ make sure that the unit stays in place while cutting. However, when using the julienne disc with hard produce such as carrots, it is recommended to keep a hand placed on the top of the unit as the force of cutting julienne style against hard produce can cause the Slice 'N Dice™ base to move back and forth slightly.

Q: Is one speed enough for my needs?

A: The Slice 'N Dice™ has an easy-to-use dial speed control giving you the ability to adjust the speed of your cutting without having to determine which speed is best for which function. The optimized 150 watt motor powerfully cuts all of your ingredients with ease, adjusting speed depending on which disc is installed.
