

Use & Care for Shears

These precision-made shears will allow you to do any household job with ease. The shears are uniquely made for left or right handed use, with an ergonomic curved design for comfort. Shears are self-sharpening as blades rub together, no need to sharpen blades further. Special hardened, rust-free steel will cut almost anything:

In the Kitchen:	Meat, bones, vegetables, and frozen foods
Around the House:	Wire, thin metals, plastic, clam shell packaging, and cardboard
In the Garden:	Flowers, shrubs, weeds, and small branches
Other Uses:	Paper, plastic bags, strings, carpet, cable, etc.

Directions for Shears:

- Squeeze handles lightly to unlock the shears.
- To lock the shears for storage, hold handles together and move lock into place over pin.

Cleaning:

- Hand-wash in hot, soapy water; towel-dry thoroughly. Do not allow blades to soak in water.

Warning: Blades are sharp! Use caution when handling!
