SO MUCH MORE THAN MEAL PREP.

With Precision Processing, you're not just breaking ingredients down into smaller pieces. You're bringing them together in ways you hadn't thought of before. From chopping a clove of garlic to making a pound of dough, big mealtime inspiration can come from a relatively small place.

TIPS FOR YOUR PRECISION PROCESSOR™ BOWL

When loading the bowl, make sure ingredients do not go past the max fill line.

3

Add liquid on top, as the last ingredient.

2

Place heavier ingredients, like chicken and root vegetables, on top of the greens and lettuces for best results.

1

Place herbs, lettuces, and greens in the bowl first so they are at the bottom.

LOADING TIPS

Don't overfill the bowl or ingredients may not break down evenly. If the ingredients exceed the max fill line, take some out.

PREP TIPS

Cut all ingredients to 1 inch or as designated in each recipe.

Peel bell peppers with a vegetable peeler prior to cutting for best performance.

For chopped salads with a lot of lettuce, chop the toppings separately and then layer them on top of a bed of lettuce.

For smoothie bowls and frozen treats, use the following frozen-to-liquid ingredient ratio: 1.5 to 1.

MEASURING MATTERS

Dry and liquid measurements differ slightly, so it's important to use the right tool for the job. Here's a simple breakdown of standard measuring cups for dry and liquid ingredients.

DRY MEASURING CUPS

Dry measuring cups are used to measure dry ingredients (like flour and sugar) as well as non-pourable wet ingredients (like peanut butter and sour cream).

Measuring Tip

Over a bowl, overfill the measuring cup. Then level the ingredient with a flat edge, like a butter knife or spatula. This will ensure an exact measurement and preserve the excess ingredient for future use.

Use dry measuring cups for:

- Flour
- Granulated white sugar
- Brown sugar
- Confectioners' sugar
- Rice & other grains
- Bread crumbs
- Cereal
- Peanut butter
- Sour cream
- Yogurt
- Cream cheese
- Fresh & frozen fruit

LIQUID MEASURING CUPS

Liquid measuring cups are used to measure liquid and pourable ingredients.

Measuring Tip

Place the measuring cup on your countertop before filling it. Once filled, bend down so you can see the measurement at eye level (looking at the cup from above will skew your view).

Use liquid measuring cups for:

- Water
- Oil
- Vinegar
- Milk
- Juice
- Stock/broth

SPIRALIZER FOOD PREP

FOR BEST RESULTS, PREPARE YOUR INGREDIENTS BEFORE SPIRALIZING

Trim ingredients so they are no taller than the Feed Chute (4"). For butternut squash and potatoes, the max recommended height is 3".

Cut ingredient so it is no more than 3" wide. Trim evenly from all sides to maintain a roughly cylindrical shape. **DO NOT** cut in half lengthwise.

Peel ingredients with tough skin, like sweet potatoes or butternut squash.

Cut both ends off ingredient to create flat surfaces, helping to secure ingredient to both the Blade Disc pin and Food Pusher.

Trim tapered ingredients like carrots to make them more symmetrical. Ingredients must be larger than 1.5" in diameter.

SPIRALIZER TIPS

WHEN SPIRALIZING

Having trouble getting long strands? Is it just shredding or creating semicircles?

Make sure the ingredient is centered on the Blade Disc pin.

Is ingredient not fully processing and just spinning on the Food Pusher?

Remove remaining ingredient from Blade Disc pin and re-trim ends to be even.

Make sure you center the ingredient on the Blade Disc pin.

Can I spiralize continuously? No, make sure you remove the ingredient from the bowl and the small amount of leftover ingredient from your Blade Disc before spiralizing another ingredient.

PREPPING/COOKING

Why are my noodles broken or short? If the Collecting Bowl is overfilled, causing the Blade Disc to lift up after spiralizing, your ingredient may have been too large. Make sure to trim and prepare your ingredients properly before spiralizing by following the instructions in the Food Prep section to the left.

Why are my noodles watery? To avoid watery noodles, pat them dry with a paper towel after spiralizing. You can also release excess water from the noodles by salting them and letting sit for 2 to 3 minutes.

CHOOSING YOUR FRUITS AND VEGETABLES

Cannot find a wide enough carrot? Look for carrots that are sold individually rather than in a bag.

Results will vary. No two fruits or vegetables are the same. For the best results, select fresh, firm, and symmetrical ingredients.

THERE'S OODLES TO NOODLE.

Cooking veggie noodles is so quick and easy, you might start wondering if some of your favorite foods can be spiralized. You're in luck, because thanks to the Auto-Spiralizer™, they probably can.

Use this guide to turn everything from carrots to broccoli stems (yes, really) into fun noodles.
