## Cleaning Tips From Chef Aaron McCargo Jr.!

***For stubborn stains, use baking soda.*** Wet the mat(s) under running water. Turn water off. Generously sprinkle baking soda all over the top. Wearing kitchen gloves, rub the baking soda and residual water droplets together to create a paste, concentrating mostly on the tough stains. Let the paste sit on the mats for 20 minutes, then rinse clean with very hot water. Dry on a drying rack or with a towel.
