

USE AND CARE GUIDE

Cook's Essentials 10" Forged Aluminum Nonstick Skillet

- Aluminum construction.
- Whitford Eclipse HB Diamond nonstick coating interior.
- Silicone polyester exterior.
- 10" in size.
- Wash before first use.
- Dishwasher Safe
- Recommend use only silicone, nylon and wood tools on interior surface.
- Skillet is heat safe to 500°F.
- This quality handle is made of real stainless steel; after oven heating over 300°F, the handle will slightly change its patina/shade. Please note this is normal and safe and does not affect the performance of the pan or its handle in any way.
- Skillet is oven and stovetop safe.
- Induction safe.
- Do not place in microwave.
- Use potholders when using on stove or in oven to prevent burns and avoid injury.
- We recommend not to cook on high heat as this may damage the non-stick coating, burn food, produce stains, or damage the base of the product.
- Never heat an empty pan or allow to boil dry. This may damage the coating or base.
- When using on glass top stoves please make sure stove is clean and that you wash and dry the cookware thoroughly so there is no risk of damaging the stove or the cookware.
- Please make sure you lift the cookware and not drag across the stove as this could cause damage to stovetops.
