We recommend using a cooking thermometer to accurately measure the internal temperature.

CHARCOAL PREPARATION

- ★ Mound charcoal, ignite using a lighter or an electric starter.
- ★ Allow charcoal to burn until it is completely gray which assures your fire is at maximum heat.
- ★ Close or cover the grill while grilling but leave all air vents open.
- ★ The ideal distance between the grill and charcoal is 3 inches. If your grill cannot be adjusted, it may be necessary to alter grilling times shown.

GRILLING TIPS

- ★ Grilling success is achieved by using direct and indirect heat. Whether using a gas, charcoal or wood fire grill, the technique is the same. First, sear the meat over direct heat (maximum heat). Then, place over indirect heat (reduced heat) for the remainder of the cooking time.
- ★ When preparing meat for the grill, avoid cutting it or piercing it with a fork. This causes the meat to lose natural juices and flavor.
