Exterior Interface	Converts 3rd party deadbolt into capacitive touch sensor
Interior Interface	Touch pad and mechanical knob
Remote Interface	Mobile App

Power

Power Supply	4 AA Alkaline Batteries
Battery Life	12 months with normal usage
Battery Status	Monitoring and notifications through Mobile App

Environmental

Operating Temperature	-40C to +85C
Operating Humidity	0–95% relative humidity, non-condensing

Certifications, Compliance, and Warranty

Certifications	FCC Part 15, IC RSS, Bluetooth SIG, ZigBee, Z-Wave
Compliance	RoHS

Mechanical Specifications

Chassis	Single Cylinder Deadbolt
Dimensions	175.7mm x 74.5mm x 38.1mm
Deadbolt Shaft Adapters	Kwikset (blue), Schlage (green), Generic (red)

Product Description

UNLOCK WITH A TOUCH

Shepherd turns your existing deadbolt into a touch-activated electronic lock. When your authorized smartphone is next to the lock, a simple touch to your deadbolt lock will unlock it. No more keys. No pin codes. Touch activation feature from outside is supported on wood, fiberglass, composite doors.

EASY ACCESS SHARING

Share virtual keys with people you trust via the Shepherd Lock app. Virtually grant and revoke access instantly from anywhere. Review full access history and be notified of lock activity.

COMPLETE CONNECTIVITY

Built-in sensors allow you to check whether your door is open or closed, locked or unlocked.

ENHANCED SECURITY

If someone tries to tamper with your lock, Shepherd Lock can sound a security alarm to ward off the intruder and notify you of the threat via the mobile app. Additionally, Shepherd Lock can automatically freeze your deadbolt in the locked position.
