

AirPro™ FAQ's

AIR COMPRESSOR

Q. Will this device be able to tell you the current pressure of the tire it is connected to?

A. Yes, the AirPro has a tire gauge that will display on the once it is connected to both the AirPro and the tire.

Q. How long is the cord for the compressor?

A. The AirPro comes with an 8" Air Hose and a 24" Air Hose extension that has the Air Chuck on the end for use with vehicle tires. When both Air Hoses are used, the total length is 32".

Q. Does this come with the air compressor adapters?

A. Yes, the three standard pump adapters are included and are in the built-in storage compartment on the side of the AirPro.

The three adapters include:

- Inflatable Adapter (Black Tube)
 - For use with pool tubes, floats, balloons, toys, etc.
- Ball Adapter (Silver Pin)
 - For use with basketballs, soccer balls, footballs, volleyballs, etc.
- Bike Adapter (Gold Threaded)
 - For use with most bicycles.

Q. Can the vehicle be running while using the air compressor?

A. Yes, the vehicle can be running while the AirPro is connected and inflating the vehicle's tires.

Q. Will the air compressor automatically shut off?

A. Yes, compressor on the AirPro will automatically shut off once the set PSI has been met. You can use the pre-determined settings or adjust the PSI settings using the control panel on the AirPro.

Q. How long does it take to fill a car tire?

A. The time it takes to fill a tire will depend on how flat it is. Through internal testing, we found that the AirPro will take about 1-2 minutes per PSI.

POWER BANK

Q. How many devices can I charge at once on the AirPro™?

A. The AirPro can charge one device via the USB Charging Port.

Q. Does the AirPro™ support Type-C Power Delivery?

- A.** No, the AirPro™ does not support Type-C Power Delivery.
- Q.** Will the AirPro™ “overcharge” my cell phone or device?
- A.** The AirPro™ is designed to optimally charge your devices. This means it will charge them quickly, as well as safely.
- Q.** How long does the AirPro™ take to charge my phone?
- A.** Charging times vary depending upon the device, the charging method, the age of the device and the level of current power. However, the AirPro™ is equipped with fast 2.4A USB Charging Port to safely charge your device as fast as it will allow.

CHARGING THE AIRPRO

- Q.** Do I have to charge the AirPro™ before I use it?
- A.** Yes, the AirPro™ must be charged before use. It is recommended to charge the internal battery to 100% before charging connected devices, and recharge it at least every 3 months.
- Q.** How do I recharge the AirPro™?
- A.** The AirPro™ can be recharged by plugging the included Type-C to USB-A Cable into the USB Car Charger, or any USB power source.
- Q.** How long will the battery last?
- A.** The battery life will depend on the usage of the air compressor and power bank in between charges. We recommend checking the battery level and recharging the AirPro every 3 months.

FLASHLIGHT

- Q.** Can I turn off the flashlight without cycling through the modes?
- A.** Yes, you can press and hold the power button to turn off the flashlight without cycling through the different light modes.

GENERAL

- Q.** Can I carry the AirPro on an airplane?
- A.** The AirPro meets FAA regulations and is approved to carry on an airplane! Please note, this power bank must be carried with you and not stored in your checked baggage during travel.
- Q.** Can I use the AirPro™ outdoors?

A. The AirPro™ is designed for indoor and outdoor use, only in dry locations. Do **NOT** expose the AirPro™ to extreme heat, moisture, water, rain, or snow.

Q. Is there a Warranty?

A. Yes, the AirPro™ comes with a 1-Year Limited Warranty by Limitless Innovations.

Q. Who do I contact if I have a question or issue with the AirPro™?
