## KEY FEATURES

### FEATURES

---

#### 2.7" LCD

The 2.7-inch LCD screen on the back of the Camera provides a perfect, glare-free way to review your photos. The wide and bright screen reproduces the images so they look as they truly appear—even in direct sunlight.

#### WI-FI

NFC and Wi-Fi enabled features like Photo Beam, AutoShare, Remote Viewfinder and Mobile Link let you share images to compatible smartphones right next to you or on the other side of the world. Photo Beam easily sends any photo that you're viewing to a smartphone instantly. AutoShare saves photos to your smartphone as you shoot and allows you to effortlessly post photos to social networks, store them on the cloud, and back them up to your PC. You can also monitor a sleeping baby from another room.

#### WI-FI SOCIAL SHARING

Show off a fabulous selfie with the rest of the world in no time flat. As long as you have a Wi-Fi connection, you can post images and videos directly to Facebook, YouTube, and now Flickr. Tag and add comments, too. You can also upload photos right to your blog, or email them to your family.

#### AUTOSHARE

Save every photo you take with your smartphone. After you set it up, Samsung AutoShare will automatically send every snap instantly to your smartphone or tablet via Wi-Fi that is powered by NFC technology. Using your smartphone, AutoShare also GPS-tags your photos. Sharing your treasured memories couldn't be any faster — or easier.

#### SAMSUNG LINK

Effortlessly save every moment you've captured. Samsung Link instantly and wirelessly streams your photos to your PC or favorite web storage service such as Dropbox. No more waiting to go home to manually upload images. With one touch, you can show off photos and videos on your Smart TV or send them to any compatible smartphone. Sharing has never been this easy.

#### PHOTO BEAM

When a friend wants a copy of that really great shot you took of her, now you can share it right away. Samsung Photo Beam lets you send photos to anybody with just the touch of your camera. Simply tap your Smart Camera on any NFC-compatible smartphone to automatically share whichever image you're currently viewing. It's that simple.

#### PC AUTO BACKUP

Wirelessly transfer photos and movies to your PC or Mac. Simply select PC Auto Backup and you're all set. All your photos and videos are wirelessly transferred and safely stored on your computer. Feel free to delete photos from your camera knowing there's a duplicate set on your computer.

#### MOBILE LINK

Now you can select and send photos or albums directly to a smartphone or tablet with Samsung Mobile Link. No Wi-Fi hotspot is required; the wireless connection is enabled by NFC technology. You don't even have to send the photos as a text message or an email. With Mobile Link, you can control the album on your phone and the changes will be saved to your camera, too.

#### WI-FI GROUP SHARE

From family brunches to nights out with friends, you can share all of the shots that your friends and family members want with your Samsung WB35 Smart Camera. Use Group Share to send images to up to four people simultaneously. Group Share eliminates the frustration of having to repeat the sharing process over and over again, so you will have more time for taking share-worthy snaps.

#### REMOTE VIEWFINDER

Control your camera by using your smartphone as the viewfinder. The NFC-enabled Remote Viewfinder lets you preview photos, adjust camera settings, zoom in and out, and frame each scene — all wirelessly from your phone. Available for select smartphones, this feature also GPS-tags your photos using your smartphone.

#### LIVE PANORAMA

With Live Panorama, you can capture a seemingly endless procession of gondolas gliding past a magnificent Venetian palace with an astounding 180° panoramic image. And you can preview the image on the LCD before you even snap it. Just hold the shutter button, sweep across the scene and see what you're going to get before you get it.

## MOTION PHOTO

With Motion Photo, you can freeze time around a moving subject to create enchanting images. Capture a friend dancing while everyone else around him is still as a statue-just like in a Hollywood blockbuster. Simply shoot the footage, and then rub the area on the display where you want action. The photo around it will freeze-it's that easy.

## SPLIT SHOT

With Split Shot, you can merge up to three different images to create an artistic statement - turn yourself into a centaur by combining a self portrait with a picture of a horse. Let your imagination loose and enjoy fun.

## SMART FILTER

Boost creative fun with Samsung's SMART Filter lens and color effects - right on the display! Cartoon Filter makes any photo look like an animated film scene while Cross Filter makes light sources appear to have several points of light. There's also Zooming Shot, Ink Painting, Oil Painting, Half-tone Dot - and many more ways for you to express your creative side!

## SMART AUTO

SMART Auto (Still & Movie) instantly analyzes key elements of your composition then automatically adjusts to capture the perfect shot with multitude of different photo modes and movie modes.

## MAGIC FRAME

Make a portrait look like an antique, or put your face on the moon - Magic Frame's 12 background templates offer lots of picture-taking enjoyment. You can also put images on a 1950's TV set or a movie. There are so many possibilities for fun - especially when you share the poster-quality results!

# Samsung microSD Cards

Standard Lineup With Adapter

## Product Brief

### From the No. 1 name in memory.

Samsung Memory has been No. 1 since 1992, and no one has produced memory cards with better performance or reliability than the engineers of Samsung memory. With proven experience for 19 consecutive years, Samsung memory delivers the highest level of performance with unmatched style.

### Everyday Performance

Samsung's Standard microSD Card lineup is the perfect solution for casual mobile devices users. With solid transfer speeds of up to 24MB/s, they work great to expand the capacity of a tablet computer or cellular phone.

### "4-Proof" Protection

Samsung microSD cards can endure 24 hours submerged in water and survive the perils of airport X-ray machines, magnetism and extreme temperatures.

Trust Samsung with your precious moments.

Samsung memory cards are designed to withstand water, shock, magnets, temperature, x-rays and just about anything else. So your memories will survive – even if your camera doesn't.

From the #1 name in memory, Samsung SD cards will protect your special moments no matter what life throws at them.

Samsung Memory Cards. Memory for Life.
