## GETTING STARTED

The RFID Blocking Wallet will arrive with a partial charge. It is recommended to charge the battery to 100% upon arrival and each use.

## CHARGING THE POWER BANK

Plug the included 24in Type-C to USB Charging Cable into the Type-C Port (Input) and into a USB power source (not included). The 4x LED Battery Indicator Lights will blink while charging and will go solid once fully charged.

## RECHARGING A DEVICE

First, determine which charging connection the device needs: Type-C, Micro, or Lightning.

- A. If Type-C**, use the Built-In Type-C Charging Cable and plug it directly into the charging port of the device. The device will begin to charge.
- B. If Micro or Lightning**, remove the compatible adapter and connect it to the Built-In Type-C Charging Cable. *See Figure 1 & 2 (below).* Once the Adapter is installed, plug it into the charging port of the device. The device will begin to charge.

## USING THE FLASHLIGHT

Press and hold the Power Button for 3 seconds to turn on the Flashlight. Press and hold again to turn the light off.

## RFID

Credit Cards, Passports, and IDs often utilize RFID chips that contain your personal data. This RFID Blocking Wallet uses a layer of aluminum to block the electromagnetic signal emitted from these items to create a barrier and cancel out electromagnetic signals.

*\*The manufacturer and distributor of this product disclaim any liability arising out of your use of this wallet, including liability from unauthorized persons scanning any RFID chip contained in this wallet.*
