## CARE AND CLEANING

- The headphones should not soak in seawater/brine for a long time, as the magnetic charge part tends to decay. When going to the beach, it's better to protect the magnetic absorption point.
- If not used for a long time, please fully charge it at least once a month.
- Do not disassemble any part of the product without permission, if you find that the earphone is defective, please stop using it.
- Keep the product away from fire, heat, freezing, and chemicals. Do not immerse the earphone in water, and do not wipe it with chemicals such as aromatherapy water.
- Store in a cool, dry place. Do not expose the product to direct sunlight for a long time.
- Please use a Charging head with an output of 5V1A or less.

## CHARGE

- The headphone uses a built-in rechargeable battery, the first use of the headphone must be fully charged to the battery. In use, if the voice prompts "low battery", the battery is low, and you need to charge the headphone.
- The charging cable should be connected to the headset's magnetic charging port. It takes about 2 hours to fully charge. Charging status indicator is red light, full charge is indicated by a blue light.

**NOTE:** Magnetic charging has a positive and negative polarity correspondence, mutual adsorption can be charged a normally, and mutual repulsion will not charge or even cause a short circuit to Magnetic charging has a positive and negative polarity correspondence. Mutual adsorption is the normal way to charge. Mutual repulsion will not charge and can even cause a short circuit.

**!** The rechargeable battery of this product must be properly disposed of for recycling. Please do not place the battery in a fire to avoid explosion.

## POWER ON/OFF
