Item# INC700

Read me before use!

Keep manual and all relevant information for future reference.

#### Safety Precautions

When using your camera, basic safety precautions should always be followed including:

1. READ ALL INSTRUCTIONS BEFORE USING YOUR CAMERA.
2. Do not use near water or other liquids. Do not place on wet surfaces.
3. Only clean using a soft, dry, clean cloth.
4. Do not allow children or the infirm to play with this product without suitable adult supervision.
5. Do not expose this product to excessive heat or fire.
6. Do not expose this product to temperatures above 100°F. Keep out of direct sunlight.
7. Do not attempt to repair this product yourself. Contact a qualified service center if the product is in need of service.
8. Do not drop, crush, or expose this product to excessive physical force.
9. This product is not intended for commercial use.
10. When charging, keep all charging cables well ventilated. Do not keep your charging cable in contact with flammable materials such as bedding, linens or synthetic fabrics.

#### Warning

- The device is equipped with an integrated lithium ion battery. The battery cannot be replaced. Do not attempt to remove the battery from the device.
- Do not dispose of in fire or expose to excessive heat.
- Do not crush, puncture, incinerate, or short circuit external contacts.
- Please recycle or dispose of the battery properly. Contact your local recycling facilities and/or the manufacturer for further information.

#### Device Usage Precautions

Please use the device within the legal scope.  
Please keep the device manual, which contains information on initial device connection. Be sure to disconnect the device from the power supply before inserting or removing a micro SD card to avoid damaging the card.  
If the device is directly connected to a vehicle's power supply, do not use the device for extended periods without the engine running, as this may cause the vehicle to lose power and become unable to start.  
Some vehicle models use a constant-power cigarette lighter. To prevent a battery failure, remove the cigarette lighter before leaving the vehicle and insert it again when restarting the vehicle to ensure proper operation.  
The normal operating temperature range for this product is -10°C to 50°C. Do not use the device in high or low temperatures, high humidity, or water.  
Avoid exposing the device to rain or excessive dust, as this may affect its operation.

#### Product overview

#### Installed on the dashboard

Note: The installation position should not block the driver's sight and affect driving safety.

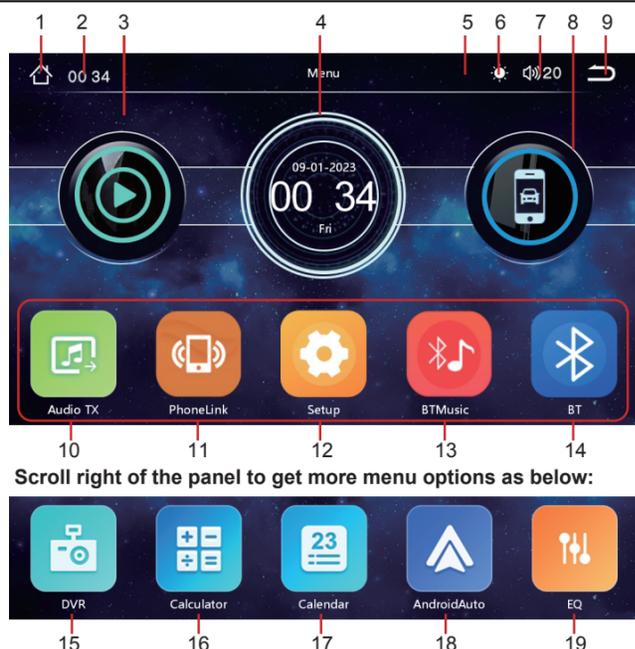

#### Connect to the power

Insert the car charger into the car's cigarette lighter, and connect the other end to the USB-C port of the device.

Note: Please be sure to use the original car charger. Other car chargers may cause damage to the device due to voltage and heat, the FM transmitter function does not work properly.

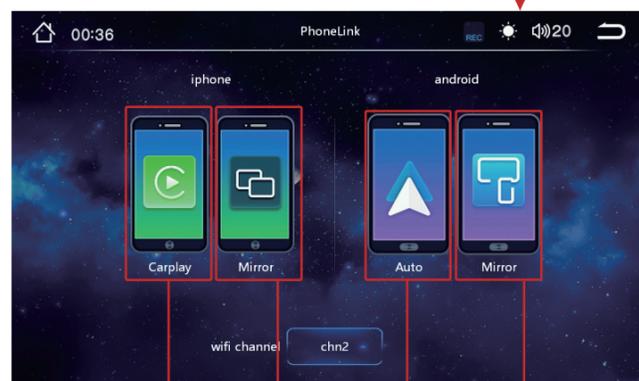

#### Interface operation

1. Home button
2. Recording time
3. Quick to connect iPhone
4. Date & time

19. EQ: adjust the audio style

#### Connect to the phone

1. Click "Connection modes" of the main interface.

Connect with iPhone for navigation

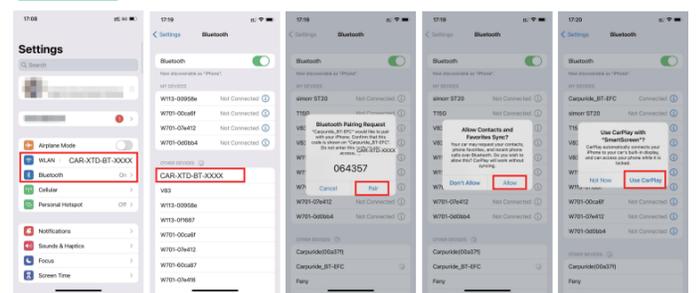

Connect with Android phone for navigation

**Mirror:** Sync with your smartphone any content  
Note: The driving recorder will not work while using the mirroring function at the same time.

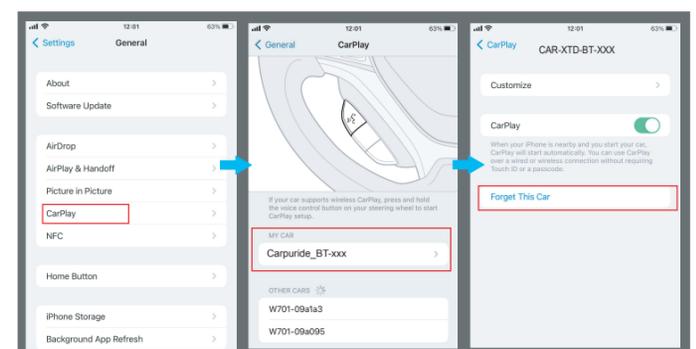

#### Connction with iPhone for navigation:

Note: Carplay and Mirrorlink cannot coexist. If the Incipio dash drive already connected with an iPhone, and you need to change the other iPhone to link to Carplay, please ignore this device from the first iPhone.

- 1 Turn on Bluetooth and Wifi in iPhone settings
- 2 iPhone searches for Bluetooth "CAR-XTD-BT-xxx"
- 3 Click "Pair"
- 4 Click "Allow"
- 5 Click "Use CarPlay"

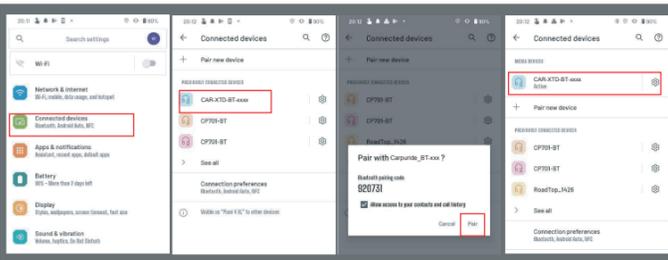

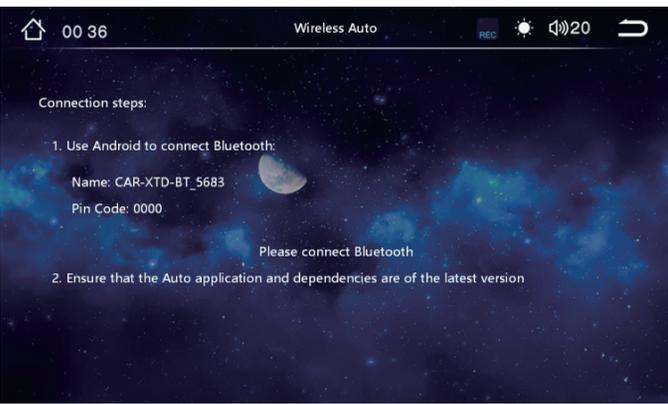

- Note:
1. Longer waiting for the first connection
  2. Only iPhone phones are supported

# 反面

## Connection with Android phone for Navigation:

Click the Android Auto icon of the Incipio dash drive and follow the image instructions to connect and use Android Auto.

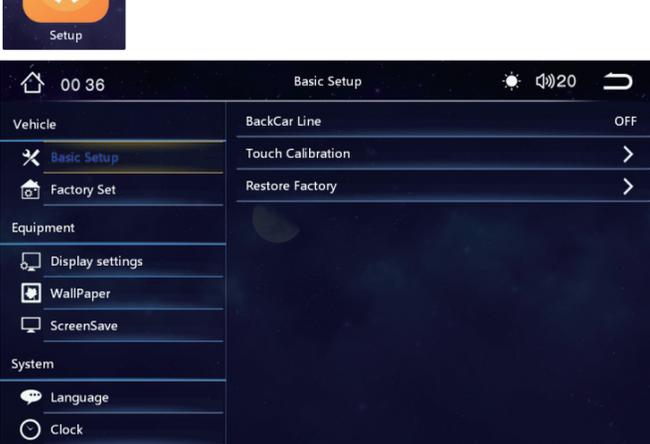

- 1 Find the connected devices
- 2 Add new device CAR-TXD-BT-XXXX
- 3 Click "Pair"
- 4 Active CAR-TXD-BT-XXXX

Note:  
1. Requires an Android phone running Android 11 or higher and 5GHz Wi-Fi.  
2. Please download the latest Android Auto application on your phone.

## System settings:

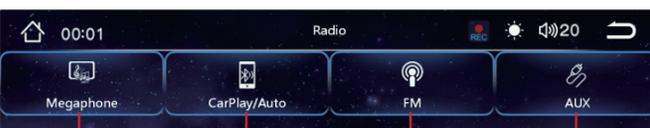

In "setup", you could change language, clock, and delete all connected devices via "restore factory", also other settings.

## Audio Output:-

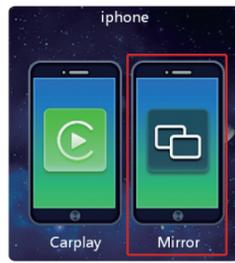

Click "Audio output" on the main interface.

**1.Speaker output**  
It can play audio directly without connecting other speakers.

1. Speaker output
2. Bluetooth output
3. FM Output
4. AUX Output

## Connect the Incipio dash drive with Mirror:

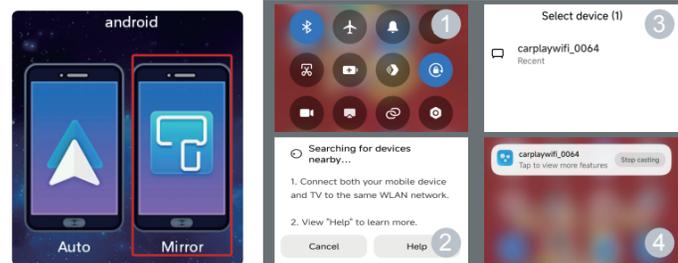

Incipio dash drive supports wireless mirror function. Connect with an iPhone, before using Mirror, please turn off Bluetooth and WiFi in iPhone settings at the same time. After disconnecting the wireless CarPlay first, use the iPhone to only connect to the WiFi of this product. Bluetooth must always be turned off. Then click the "Phone link" icon on the main menu of the Incipio dash drive. Turn on the Wi-Fi and find the Wi-Fi name "carplaywifi\_xxxx" in the Wi-Fi list, click to pair with password 12345678.

Note: With this function, you only need to connect to the car stereo's WiFi to mirror the screen, without connecting to Bluetooth.

To connect with your **Android phone** with Mirror, make sure your phone with Mirror function. Select the "car" from the mirror devices list then connect from your smartphone as following:

## Dash video recorder:

The Incipio dash drive includes a front camera with 360 rotates.

To review the menus of dash camera, refer as following:

## 2. Bluetooth for CarPlay / Android Auto output

Through the Bluetooth connection, you can easily answer or make hands-free calls, play music, etc., which is safer and more convenient while driving.

## 3.FM output

Speaker BT Audio FM AUX

- Adjust the car FM to an idle frequency band, such as FM 106.0 MHz.
- Adjust the device to the same frequency band.
- After the car FM successfully receives the FM signal of the device, the sounds will be played by the original car audio.

Note:

- When using FM to connect CarPlay, do not use the same frequency as the broadcast, otherwise CarPlay will experience frequency jumping or no sound. You can choose the AUX cable connection method, which can effectively solve this problem.
- Recommended FM frequency range: 76 MHz ~ 108 MHz.
- When the FM interface is turned on, the device will no longer emit any sound. You need to connect the sound to the original car audio through FM or switch to another audio output mode.
- Not using the original car charging cable will cause the FM signal to deteriorate or the function cannot be used.
- The output current is unstable when the engine is started. Please turn off FM before stopping the car, otherwise FM will make noise when restarting the engine.

## 4.AUX output

- Set the car's audio input mode to AUX audio input.
- Insert the AUX cable into the car AUX port and connect the other end to the AUX OUT port of the device.
- The sound can be played by the original car stereo.

Note:

The location of the AUX may vary depending on the car model. Please confirm if your car supports AUX IN. For more information, please consult the manufacturer.

## FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
