Dr. Eggman (AKA Dr.Robotnik) has taken over Mt. Mobius and turned it into a mechanical base. He is using energy from the magma flowing under the volcano to power his Veg-O-Fortress. He has the power to transform helpless animals into robot slaves. Sonic the Hedgehog and Tails must take down this fortress to free the enslaved animals. The only way to make that happen is to trigger an eruption in the volcano it's built on. Sonic knows this can be done by removing the Chaos Emeralds that keep the volcano stable. Dr. Eggman, however, is also aware of the fragile relationship that exists between the Emeralds and the mountain, and he's set up an elaborate Pinball Defense System to make sure the precious jewels don't go anywhere.

The checker game is composed of 1 board and 32 pieces. It is for only one player, and the goal is to leave just one piece on the center of the board.

There are several initial positions for the pieces; the most common one is the one which has all holes occupied except the one in the center. The capture is made by having one piece jump over another. Each time one piece jumps over another; the one that is jumped over is removed from the board. Pieces can only be captures in a straight line, which means, it is not allowed to jump diagonally. The game proceeds until it gets impossible to capture another piece.

To select the piece to be moved or to cancel the selected piece, press A, B or C.

11. Chess

Chess is a game played between two opponents on opposite sides of a board containing 64 squares of alternating colors. Each player has 16 pieces: 1 king, 1 queen, 2 rooks, 2 bishops, 2 knights, and 8 pawns. The goal of the game is to checkmate the other king. Checkmate happens when the king is in a position to be captured (in check) and cannot escape from capture.

Movement of the Pieces

Pawn

The pawn moves differently depending on whether it moves to an empty square or whether it takes a piece of the opponent. When a pawn does not take, it moves one square straight forward. When this pawn has not moved at all. i.e., the pawn is still at the second row (from the owning players view), the pawn may make a double step straight forward. For instance, a white pawn on d2 can be moved to d4. When taking, the pawn goes one square diagonally forward.

Rook

The rook moves in a straight line, horizontally or vertically. The rook may not jump over other pieces, That is: all squares between the square where the rook starts its move and where the rook ends its move must be empty. As for all pieces, when the square where the rook ends his move contains a piece of the opponent, then this piece is taken. The square where the rook ends his move may not contain a piece of the player owning this rook.

Bishop

The bishop moves in a straight diagonal line. Like the rooks, the bishop also may not jump over other pieces.

Knight

The knight makes a move that consists of first one step in a horizontal or vertical direction, and then one step diagonally in an outward direction. The knight jumps: it is allowed that the first square that the knight passes over is occupied by an arbitrary piece.

Queen

The queen has the combined moves of the rook and the bishop, i.e., the queen may move in any straight line, horizontal, vertical, or diagonal.

King

The king moves one square in any direction, horizontally, vertically, or diagonally.
