## Emerson

# SMARTVOICE WALL PLUG
## USB-A & USB-C
### QUICK START GUIDE

**No App · No Wi-Fi · No Hub**

**ATTENTION:** Only the devices plugged into the SmartVoice socket on the wall plug can be voice controlled. The SmartVoice socket is labeled "SmartVoice" on the wall plug. Devices connected to the standard socket will always be on as long as the wall plug is connected to a wall outlet.

# LET'S GET STARTED WITH VOICE CONTROL

## Please refer to the manual for additional information

The SmartVoice Wall Plug is equipped with a microphone to listen to voice commands and an LED light to confirm received commands.

Voice control is ready for use once the SmartVoice Wall Plug is connected to a wall outlet.

The wake word is the phrase that activates the voice control function.
To control the SmartVoice Wall Plug with voice commands, follow the next two steps:

### STEP: 1
Say the wake word, the light on the SmartVoice Wall Plug will pulse to confirm activation of the voice control function.

### STEP: 2
Next, you will have 7 seconds to use one of the commands listed on the back. After each command, the SmartVoice Wall Plug will confirm the command with 5 quick pulses.

## NOTE:
· Once the initial command is given, you can give another command within 7 seconds of the previous one.

· If another command is not given within 7 seconds of the previous one, say the wake word before giving a new voice command.

· If the SmartVoice Wall Plug does not recognize a voice command, it will not respond and continue operating according to its current settings.

# COMPATIBLE VOICE COMMANDS FOR SMARTVOICE WALL PLUG

| Functions | Voice Commands |
|---|---|
| Wake voice control | Hey Emerson |
| Turning on the SmartVoice socket | Turn on |
| | Lights on |
| | Power on |
| | Power up |
