

Revers-A-Brella

No Drip Auto Open & Close Umbrella

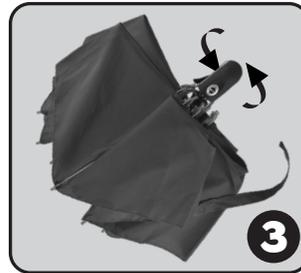

Instructions

1. Remove Umbrella from carrying bag by pressing and sliding the draw string button outward to release bag. Expand neck of bag and remove umbrella. Remove and discard the protective bubble wrap cover from the handle.

2. To open, unwrap Hook & Loop Strap at top of Umbrella.

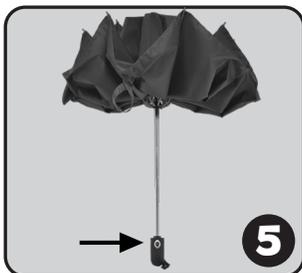

3. Before pressing the Silver Auto Open button, be sure the panels of the umbrella are not stuck together. Please shake the umbrella to ensure the ribs of the umbrella do not open inverted.

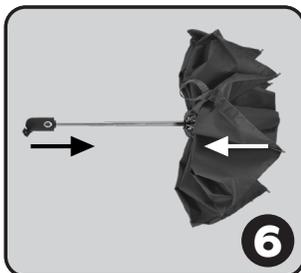

4. With umbrella facing away from you, Press Silver Auto Open Button on the handle. The Umbrella will open automatically.

Please use Caution when opening the umbrella as it opens quickly.

5. To close, Press Silver Auto Close Button on the handle. The umbrella will close automatically.

6. To fully close, hold umbrella in a horizontal position. Press spring loaded handle inward until handle locks into place.

7. Wrap Hook & Loop Strap at top around Umbrella until it is fully tight. The wet side of the umbrella is now fully inverted exposing only the dry side.

NOTE: Be sure to wrap Umbrella tightly to fit into carrying bag.

8. Insert Umbrella back into carrying bag by sliding end of Umbrella with Hook & Loop Strap into open end of bag. Press and slide draw string button inward to close bag.

****Please Note if the umbrella opens inside out, the umbrella is not broken.**

The ribs of the umbrella may become stiff if closed for an extended time causing the ribs to open inverted. Simply close the umbrella and reopen to correct the ribs.

***Please Note before wrapping Hook & Loop Strap around Umbrella, drain the excess water that is captured in the Umbrella.**
