

No Drip Auto Open Umbrella Instructions

1. Remove Umbrella from carrying bag by pressing and sliding the draw string button outward to release bag. Expand neck of bag and remove Umbrella. Remove and discard the protective bubble wrap cover from the Handle.

2. To open, unwrap Hook & Loop Strap at top of Umbrella.

3. With Umbrella facing away from you, Press Red Button above Handle. The Umbrella will open automatically.*

*Please use caution when opening Umbrella as it opens quickly.

4. To close, wrap your hand around the sliding mechanism at top of Umbrella.

5. Guide sliding base of Umbrella downward as it begins to invert and close upward.

6. Continue to guide Umbrella downward until sliding mechanism** connects with top of Handle.

****Be careful not to twist sliding mechanism when closing, guide straight down to handle until catch clicks into place.**

7. Wrap Hook & Loop Strap at top around Umbrella until it is fully tight to be able to fit into carrying bag. The wet side of Umbrella is now fully inverted exposing only the dry side.***

*** Please Note: Before wrapping Hook & Loop Strap around Umbrella and standing it with the Handle upright, drain the excess water that is captured in the Umbrella.

8. Insert Umbrella back into carrying bag by sliding end of Umbrella with Hook & Loop Strap into open end of bag. Press and slide the draw string button inward to close bag.
