How-To STYLE GUIDE

BEFORE

1. Plug in base.
2. Place the Magnify rollers on the platform prongs. Then, press the On button. The platform will light up, when turned on, with blue LED lights that reduces bacteria on the rollers while heating.

3. Wait for 2-3 minutes, until red dot on the top of the rollers has brightened fully. This lets you know that the rollers are heated and ready to be used!

Note: The cooled acrylic edges on the rollers are specifically designed, to make styling safe and easy!

4. Section the hair as needed.
* Hair sectioning clips not included.

5. Roll the hair in small sections, using the Magnify clips to hold the roller in place.

Start rolling the hair from the top of the head and crown, moving to the sides and then to the back of the head. If you have layers, work from the top layer to the bottom.

7. Wait for 5 minutes or longer, after the red dot has dimmed or disappeared and the roller has cooled, to remove the roller. The longer the roller stays in, the more curl and body the rollers will create.
* Only 9 rollers included.

8. Brush through the hair for softer more magnified natural body.
