

WHOLETONES[®]
2SLEEP

Congratulations!

You are well on your way
to getting a better
nights sleep...

Learn about ports and how to connect.

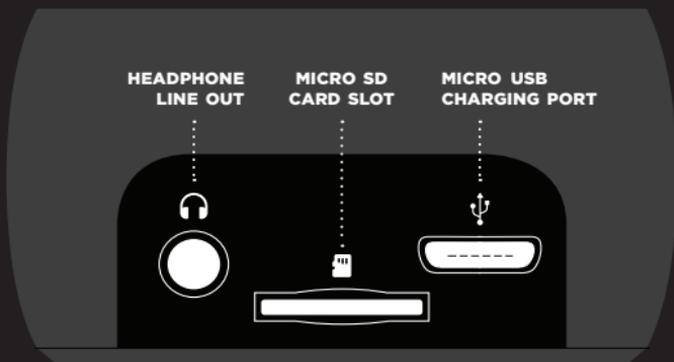

MICRO USB CHARGING PORT IMPORTANT!

Only use the wall charger and cable that came included with your device. Other chargers (i.e. mobile phone chargers, etc.) may result in damage to device.

To charge, insert cable into device and other end, with plug, into wall outlet. Or charge without wall adapter with your PC when PC is turned on. Charge device 3-4 hours for best performance. Expect 4-6 hours play time when fully charged.

3.5MM HEADPHONE LINE OUT

For private listening, insert your headphones or earbuds (not included).

INTERNAL BATTERY

Rechargeable power supplied by a built-in 500mAh lithium ion battery. Do not dispose of batteries in fire. Batteries should be recycled or disposed of as per state and local guidelines.

AUTO-REPEAT FUNCTION

For continual listening enjoyment, your player will automatically repeat the song cycle. For continual listening, power the device through the electrical outlet instead of using battery.

MICRO SD CARD SLOT

To play your own music files, simply insert your SD Card (not included).

TECHNICAL SPECIFICATIONS

SOUND BOX TYPE **Portable Card Sound**

CONTROL TYPE **Buttons**

SPEAKER MATERIAL **Aluminum**

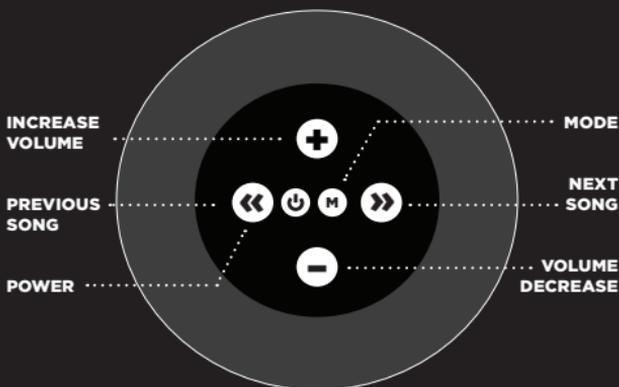

RATING **3 Watts**

SIGNAL TO NOISE RATIO **≥90dB**

BATTERY **500 mAh**

Frequently Asked Questions

What if I don't hear any sound coming out?

Do you hear Michael say "Power on" when you turn the player on? Do the buttons light up orange? If you answered yes to these questions, your player appears to be working! Our recommendation is to use your fingernail to press the SD card lightly into the unit (it can be found in the small slot on the side of the player) and the SD card will pop back towards you. Remove the SD card completely and then reinsert it, making sure it is pushed in all the way. The music should begin to play once it is properly in place.

How can I be sure my player is charging?

Make sure the USB end of the charger is snug into the charging port, which is plugged into the wall. Insert the mini USB end into the side of the player, also confirming that it is in snug. If your unit is properly charging, there is a small orange/red light beneath the headphone jack port that will turn on when the player is charging correctly.

How do I turn *2Sleep* on?

Hold down the power button, that looks like this  The buttons should light up orange and you should hear Michael say “Power on”. If that doesn’t work, please charge your unit and try again.

***2Sleep* is stuck in Bluetooth Mode. How do I change it?**

Try clicking (not holding) the  button. This is the “Mode” button and will switch the unit from Bluetooth Mode to your **WHOLETONES** album. If it will not switch, please make sure the SD card is snug within the unit (see directions below) and try clicking the  button again.
