### IMPORTANT SAFETY INSTRUCTIONS:

**THIS IS NOT A TOY — KEEP OUT OF REACH OF CHILDREN.**

**DO NOT USE THE VINO POP™ WINE ACCESSORY KIT TO OPEN SPARKLING WINE, CHAMPAGNE, OR CORKED BEVERAGE WITH CARBONATION. DO NOT LEAVE THE VINO POP™ WINE ACCESSORY KIT UNATTENDED WHILE IN USE. IT PRESSURIZES THE BOTTLE, WHICH CAN LEAD TO INJURY IF UNATTENDED.**

**CAUTION: SHARP NEEDLE.** Do not stick fingers or other appendages into the Bottle Neck Cover of the wine opener.

- Switch to a conventional wine opener if air is not being pumped through the needle on the wine bottle opener.

### USING YOUR VINO POP™ WINE ACCESSORY KIT

Use the foil cutter to cut and remove the bottle seal from the wine bottle. **WARNING: YOU MUST CUT AND REMOVE THE FOIL BEFORE USING YOUR VINO POP™ WINE OPENER.**

Align the needle with the top of the cork and gently press down until the needle is fully submerged. **WARNING: DO NOT LEAVE THE VINO POP™ WINE OPENER UNATTENDED WHILE IT IS IN USE.**

Grasp the bottle while raising and lowering the pump. The cork will begin to rise. Carefully remove the opener when most of the cork is removed from the bottle. **NOTE:** If you are attempting to remove a natural cork, you may have to guide the Vino Pop™ wine opener up with the cork while pumping.

Use the cork removal ring to push the cork out of the wine bottle opener.

## TO PRESERVE LEFTOVER WINE

### STEP 1

Insert the wine bottle stopper into the wine bottle neck and press firmly until secure. Make sure you are holding the wine bottle while inserting.

### STEP 2

While holding the wine bottle, begin pumping the stopper. Pump the stopper until you feel it wanting to drop down quickly on its own.

A wine bottle approximately half full may require 60 pumps until this occurs. If there is less liquid, more pumps will be required, and if there is more liquid, it will require less pumps.

## USING THE AERATOR

Hold the wine aerator from the side. Firmly press it into the bottle until secure. Pour wine.

**CLEANING INSTRUCTIONS:** Spot clean as needed.
