

Van Zyverden's
DAFFODIL CLASSIC IMPROVED KING ALFRED TYPE

Daffodils (botanically known as narcissus) flower in spring, are winter hardy and multiply rapidly. Daffodils are long-lived perennials, making them perfect companions to not only other spring flowering bulbs, but also annuals, other perennials and shrubs. Daffodils soften hardscapes, accent any garden and are an inexpensive solution to adding color to your spring garden and containers. With its deer and critter resistant attributes, daffodils are ideal for large plantings and naturalizing to provide years of easy spring color.

*Most sought-after
daffodil variety*

Narrow, strap-shaped leaves

*Bright yellow trumpet
shaped flower*

About This Variety: King Alfred Daffodils are world famous and highly sought after. Bred in 1899, and recognized as the 'standard' yellow trumpet daffodil until just after World War II when new yellow daffodils with better form and performance emerged. King Alfred Daffodils are no longer grown in volume but the 'legendary' myth lives on. To satisfy requests, we have an improved, classic King Alfred Type look-alike that is better than the original.

Growing Instructions: In fall, plant the bulbs deep in fertile soil with the pointy end up in an area with full sun to partial shade. These bulbs do not like wet feet. Water during their growth period. Fertilization helps growth and natural increase by offsets. Daffodils can be left undisturbed to naturalize for years. If you cannot plant them immediately, store in a cool, airy place.

Care Tip: When given ample sun light, water, and proper nutrition, removing the flowers as soon as they fade and allowing the leaves to brown before removing, they will return for years to come with little to no effort.

Exposure: Full sun to partial shade

Height: Grows 16-18" tall

Spacing: Plant 8" apart, 6" deep

USDA Zones: Hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
