

Van Zyverden's
PATIO PEONY™ LONDON FOR CONTAINERS

Peonies are perennials and are known to live for decades, even generations. The blooms are outrageously beautiful, producing lush, glossy green foliage all summer long. Foliage turns purplish or gold in the fall and is as stately and dignified as any shrub. They are somewhat more expensive to propagate, but well worth the investment in your garden.

Great for containers

Short and compact

Beautiful blooms

About This Variety: Patio Peony™ London is specifically bred for container culture, featuring strong stems and upright double flowers.

Growing Instructions: These peonies are best grown in pots sized 6-10". The roots can be pruned back to fit the pot, but do not cut off the eyes. It is important to cover the entire root with about 1.5-2" of soil since the eyes should never dry out. Good soil drainage and airy soil is best for good root development. They can be planted anytime from September through March. Drench well after planting, never letting the soil dry out during the growing process. They like being fertilized and need at least 8 weeks minimum of wintertime temperatures. Maximum light will prevent stretching of flower stem.

Care Tip: Warmer temperatures encourage root development, while cooler temperatures encourage shoot (eye) growth. To ensure all shoots develop, follow cooling requirement.

Blooms: Late Spring

Exposure: Full Sun to Partial Shade

Height: Grows 24" tall

Spacing: Plant 1.5" deep

USDA Zones: Hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
