

Van Zyverden's
IRIS BLACK CHRYSOGRAPHES

Siberian iris are suitable for borders, garden beds, wild gardens and along the edges of ponds - but not for growing in water. They do, however, combine easy care with grace and beauty. They make stunning cut flowers! Excellent naturalizer that adds drama to your garden.

Velvety, blackish flowers

*Attracts butterflies
& hummingbirds*

*A solid perennial returning
year after year*

About This Variety: Iris chrysographes are black-flowered siberian iris which make it a sensational accent to just about any garden. The velvety, amazingly near black flowers bloom atop slender, elegant gray-green stalks. In nature there are no true black flowers but these come as close as you can get. Slightly scented blooms.

Growing Instructions: Plants grow best in moist, acidic soil but also tolerate drier soil.

Care Tip: Upon receipt, soak your rhizomes in water overnight to jump start growth. Fertilization is great for them. Feed in spring with a nitrogen rich fertilizer.

Blooms: Spring

Exposure: Full Sun to Partial Shade

Height: Grows 18-20" tall

Spacing: Plant 4" apart, 4" deep

USDA Zones: Hardy in USDA zones 4-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
