This generator provides 3500 Running Watts (with 4000 Surge Watts)

Wattage Consumption Guide

- Using the item chart provided, select the items you wish to power at the same time. Then insert the corresponding numbers into the Running (Rated) Watts and Surge (Starting) Watts columns below.
- Add up the Running (Rated) Watts of the items you wish to power and enter this number in the Total Running (Rated) Watts space.
- Select the one individual item with the highest number of additional Surge (Starting) Watts. Take this one number, and add it to your Total Running (Rated) Watts, then enter it in the Total Surge (Starting) Watts space.

Tool or Appliance	Running (Rated) Watts	Surge (Starting) Watts
1. Refrigerator/Freezer	700	2200
2. 1/2 HP Furnace Fan	800	2350
3. Television	500	0
4. Lights (8 x 75 watts)	575	0
5. Microwave	625	0

Highest Additional Surge Watts

Total Running (Rated) Watts = 3200 **2350**
Total Running (Rated) Watts = + 3200
Total Surge (Starting) Watts = **5550**

YOUR POWER NEEDS	Running (Rated) Watts	Surge (Starting) Watts
1.		
2.		
3.		
4.		
5.		

Total Running (Rated) Watts = +
Total Running (Rated) Watts = +
Total Surge (Starting) Watts = +

With this example you need a generator that produces at least 3200 total running watts and 5550 total starting watts.

The information above is estimates only. For best results, check your tool or appliance for exact wattage requirements. The wattages listed are based on wattage requirements. For exact wattages, check the data plate or owner's manual on the item you wish to power.

* SURGE WATTS / RUNNING WATTS MAY BE REDUCED BY 10% WHEN USING PROPANE FUEL VS USING GASOLINE.
