

Van Zyverden's
DAFFODIL 2019 COLOR OF THE YEAR LIVING CORAL

Daffodils (botanically called *Narcissus*) are long term perennials and make for great companions to not only other bulbs, but also annuals, perennials, and all sorts of shrubs. They soften hardscapes, accent most any garden, and are an inexpensive solution to adding color to your garden on nearly any budget. They are relatively pest free, and deer will not eat them. Daffodil classifications become quite technical, as they are divided into 13 divisions according to their flower shape and heritage by the American Daffodil Society. They do well throughout most of the U.S., as long as there is a discernible winter. Daffodils are ideal for large plantings and naturalizing, making them an exceptional value item and providing years of carefree color.

Narcissus Shrike

Pantone Color of the year for 2019

Vibrant and mellow with warmth

About This Variety: "In reaction to the onslaught of digital technology and social media increasingly embedding into daily life, we are seeking authentic and immersive experiences that enable connection and intimacy. Sociable and spirited, the engaging nature of PANTONE16-1546 Living Coral welcomes and encourages lighthearted activity. Symbolizing our innate need for optimism and playful pursuits, PANTONE 16-1546 Living Coral embodies our desire for playful expression," by Pantone.com. We think this variety best represents this color.

Growing Instructions: In fall, plant the bulbs pointy end up, in deep, fertile, well draining soil in full sun to light shade. Bulbs do not like wet feet. Water during their growth period. Fertilization helps growth and natural increase by offsets. Daffodils can be left undisturbed to naturalize for years. If you cannot plant them immediately, store in a cool, airy place.

Care Tip: When given ample sun light, water, and proper nutrition, removing the flowers as soon as they fade and allowing the leaves to brown before removing, they will return for years to come with little other effort.

Exposure: Full sun to partial shade

Height: Grows 14-16"

Spacing: Plant 8" apart, 6" deep

USDA Zones: Hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
