*Ships as a dormant young plant
in a 2 quart nursery pot,
in its sleeping beauty stage*

*Dormant plants ship without leaves nor
flowers as it's all about the roots*

About This Variety: Hibiscus Purple Pillar[®], Hibiscus syriacus 'Gandini Santiago' PP#25,568, CBR#6178 will be Proven Winners[®] 2023 Landscape Shrub Of The Year. It's also know as Rose of Sharon. Purple Pillar[®] is a very narrow, fastigiate habit much like Fine Line[®] rhamnus, but with semi-doubled purple flowers in the summer. Space saving plant. Award Winning: 2012 Plantarium Silver Medal, 2016 Honorable Mention – Farwest Show, 2017 Direct Gardening Association Green Thumb Award.

Growing Instructions: Plant Hibiscus in the spring after all danger of frost has passed in a full sun location. Dig a hole approximately a 12" deep and a 12" wide. Place the plant in the hole and fill it half full with soil. Fill hole with water. After water has drained, fill the rest of the hole with the remaining soil. Water thoroughly again and continue doing so regularly. Fertilize at planting and then again each year after flowering.

Care Tip: Hibiscus blooms best in full sun. Little to no pruning will allow it to bloom profusely with smaller flowers, while heaving pruning will create larger but fewer flowers.

Blooms: Summer

Exposure: Full Sun

Height: Grows 10-16'

Spacing: Plant 2-3' apart, set root ball even with ground level

USDA Zones: Hardy in USDA zones 5-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
