

WINTER WINDSHIELD COVER

WARNING: Never operate the vehicle with the product installed on the windshield. It is only intended for parked vehicle use. FrostGuard® should not be used as a sunshade or in extremely hot weather. FrostGuard® is designed to cover the substantial viewing area of the windshield. Perimeter edges may not be covered. Using too large a size can result in a loose fit, resulting in precipitation blowing under the cover. For best results, apply over a dry windshield.

How-To
Video

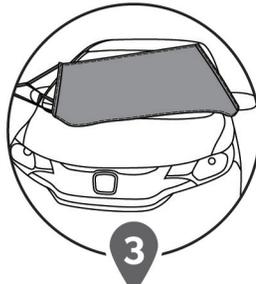

- 1 Open the driver side door and make sure the security panel is hanging inside the door frame. Close the door, making sure the security panel stays in place.

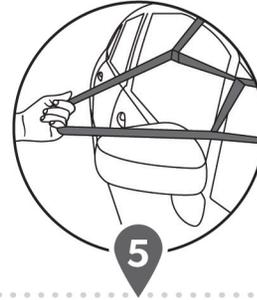

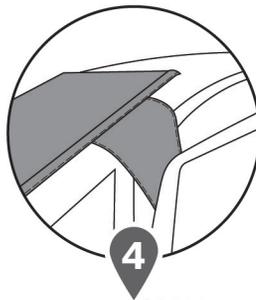

- 2 Choose the Fit-Fast® elastic loop that works best for your vehicle and place it over the side view mirror.

- 3 Unroll the cover as you walk around the front of the vehicle.

- 4 Lightly tug on the cover to center the unit on the windshield. Open passenger side door and make sure the security panel is hanging inside the door frame. Close the door, making sure the security panel stays in place.

- 5 Lightly tug on the cover to center the unit on the windshield. Slide the corresponding Fit-Fast® elastic loop over the mirror.

- 6 Smooth the cover, making sure it is lying flat against the windshield.

- 7 Slide the mirror covers over the side view mirror and cinch the plastic toggle to provide a snug and secure fit. Repeat this step on the opposite side of the vehicle.
