3

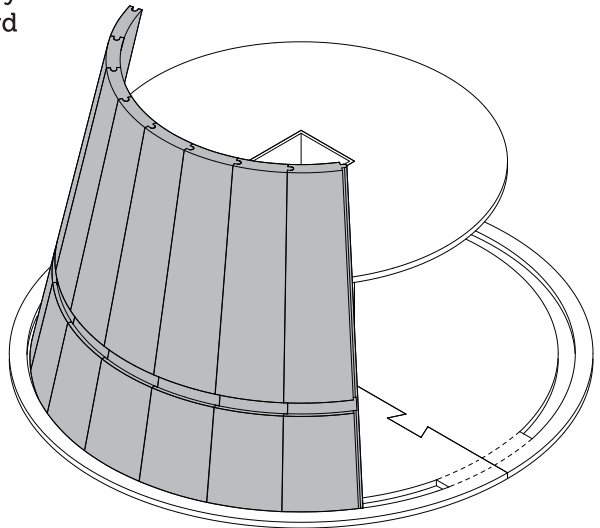

6

Start to build the Barrel Upside down.

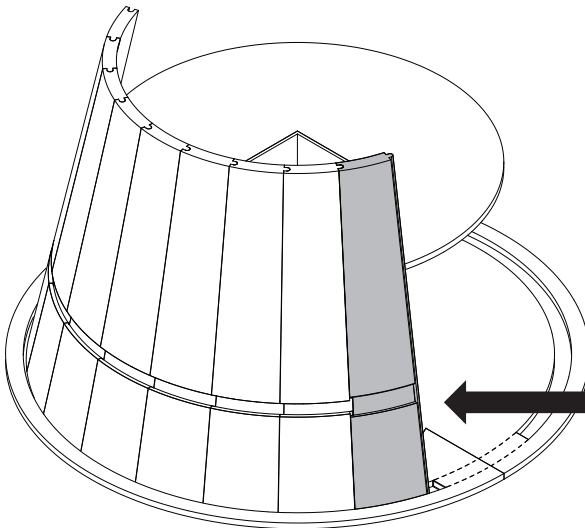

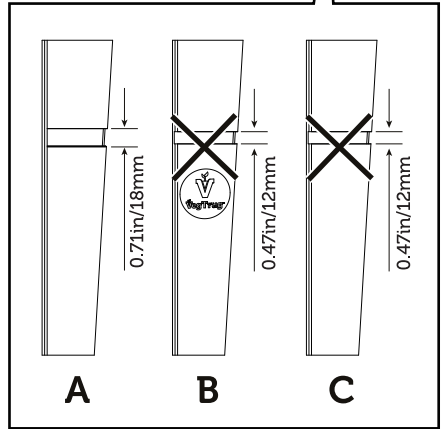

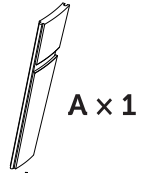

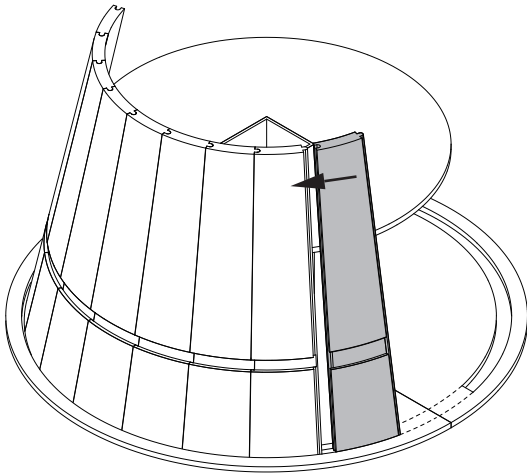

Pick the proper wood pieces.

Line up 8 Pieces with the thin cut gaps. Slide together. They should lean on the cardboard stand

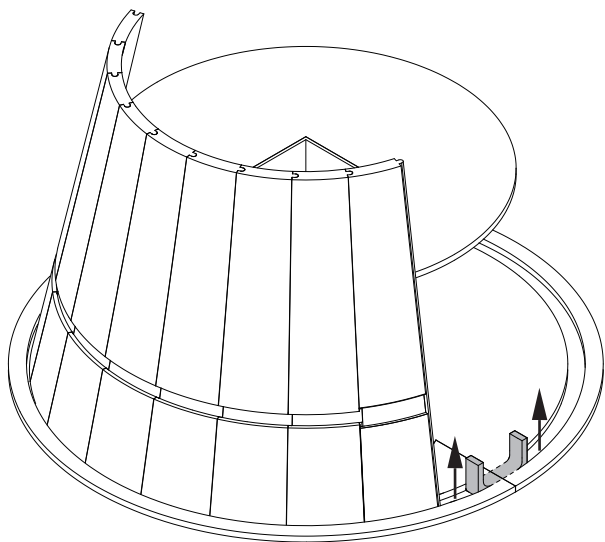

7

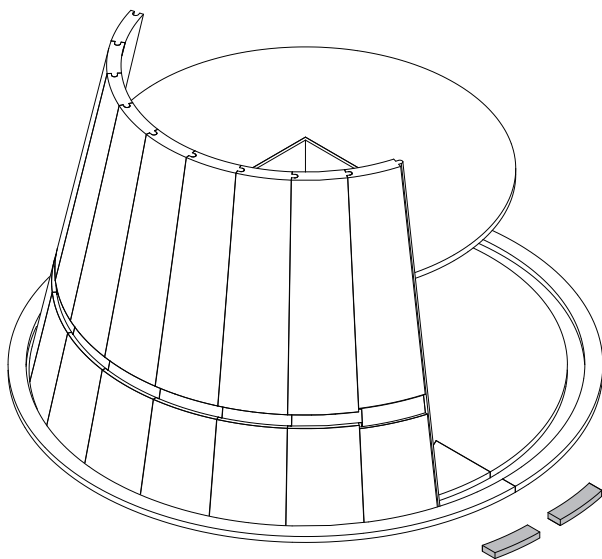

Slide in the one piece
with the wide cut gap

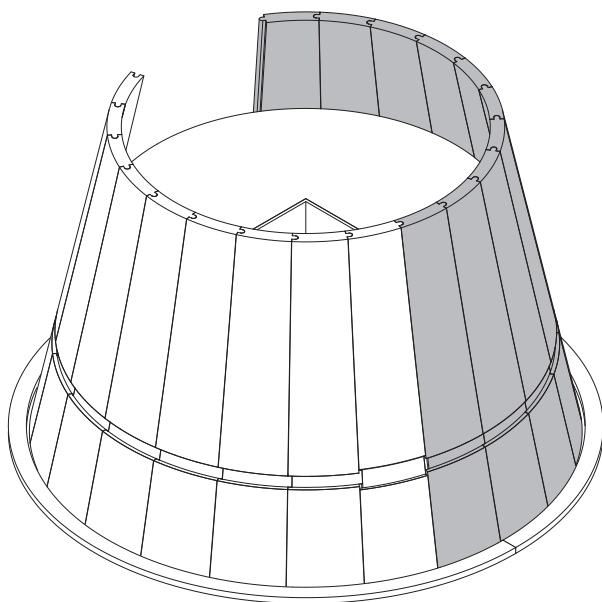

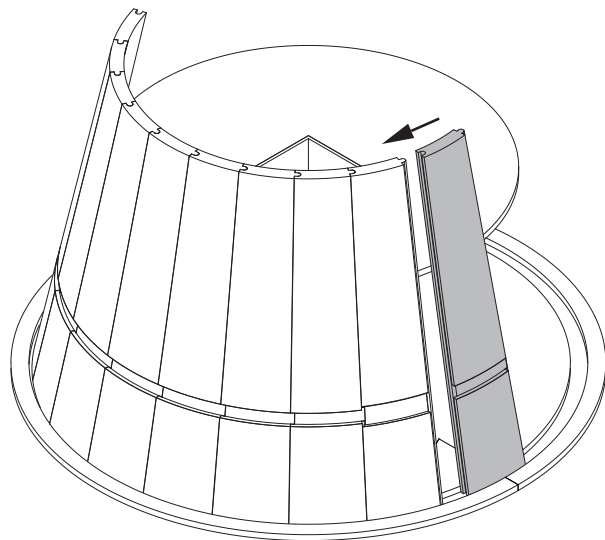

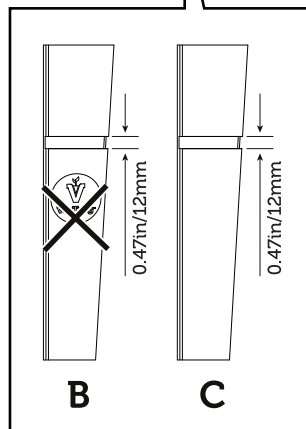

Wide cut gap

Pull out small tab
on one side

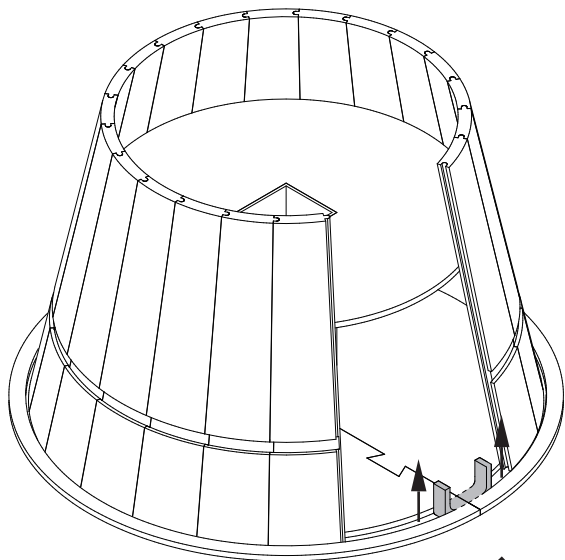

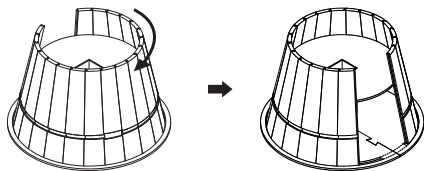

9

 $C \times 10$ 

Add 10 more wood slats.
Don't use logo slat yet

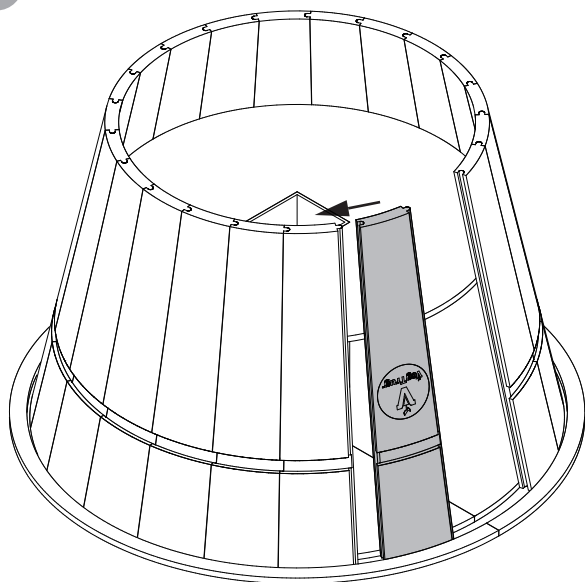

10

Remove last small tab

11

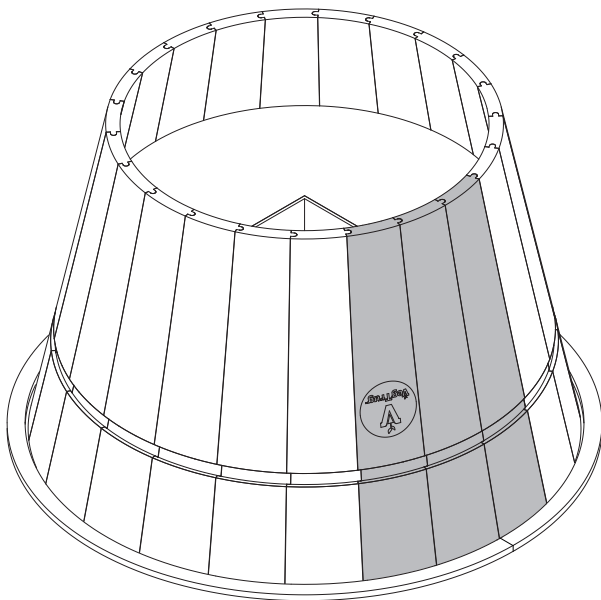

B x 1

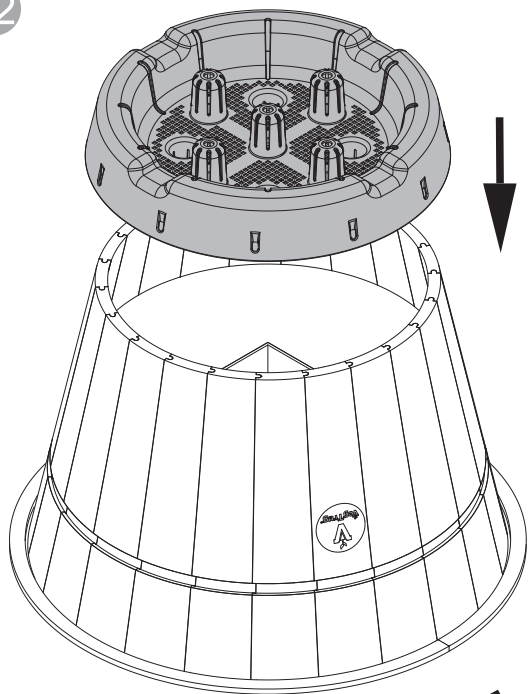

C x 2

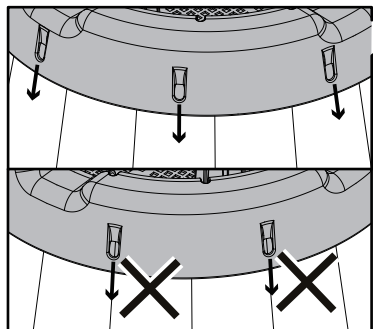

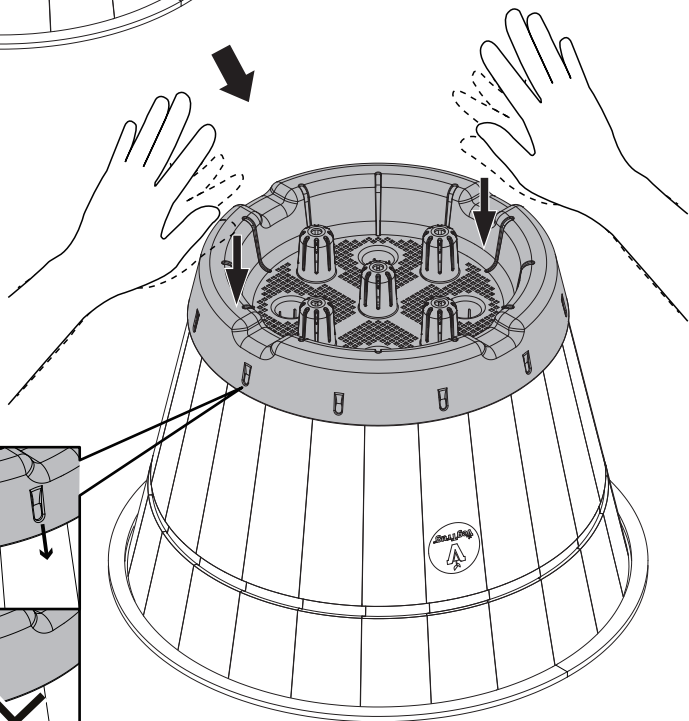

Add wood slat with logo and the last two wood slats

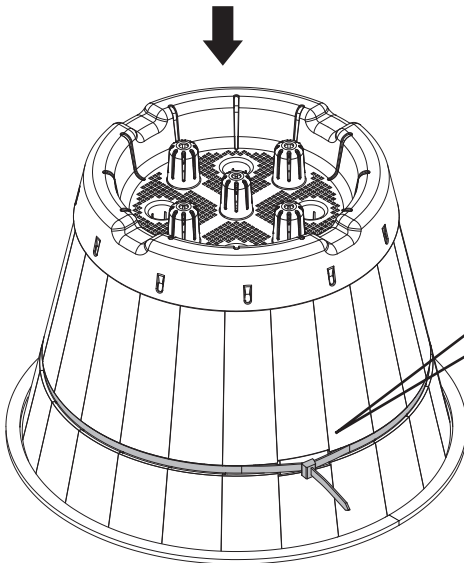

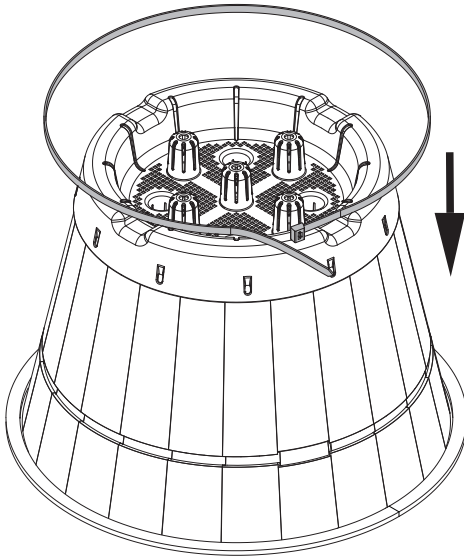

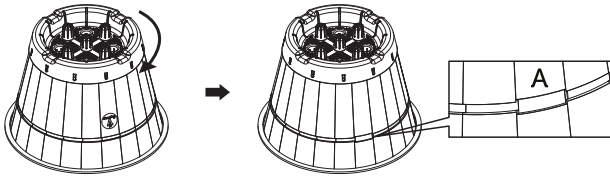

12

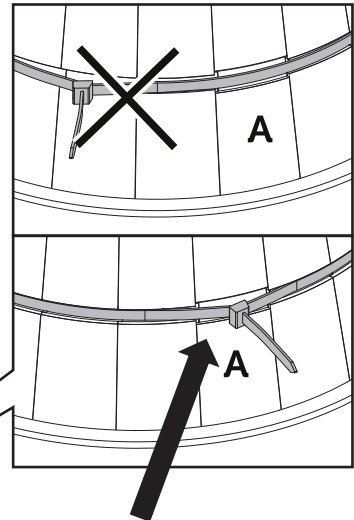

Slide plastic base onto the wood slats. Adjust the base so the screw holes in the base line up in the middle of the wood slats

13

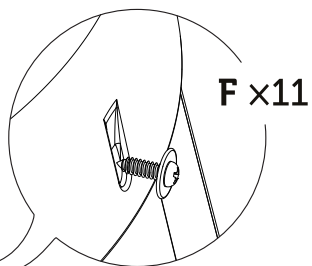

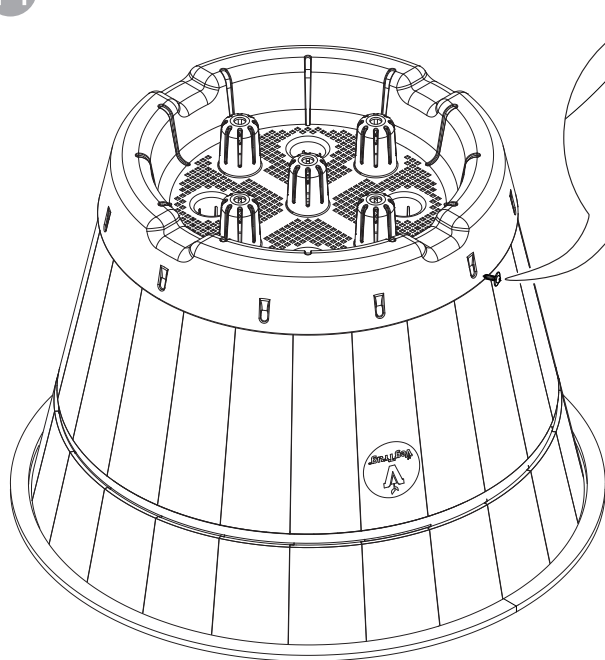

Once snug, trim off
excess end of zip tie

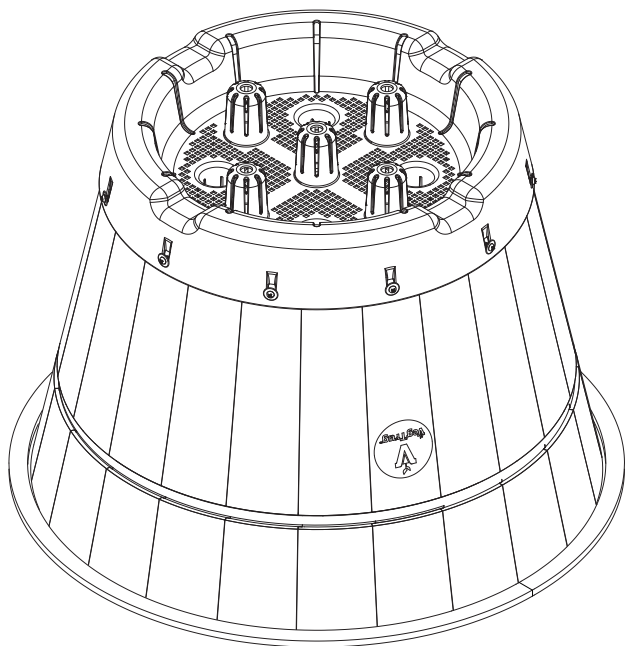

Slide the large Zip tie down
the barrel, down to the gap
on the wood slats. Tighten
the tie. NOTE – Align the tie
so the large connector, fits
into the wood slat that has
the large cut gap.

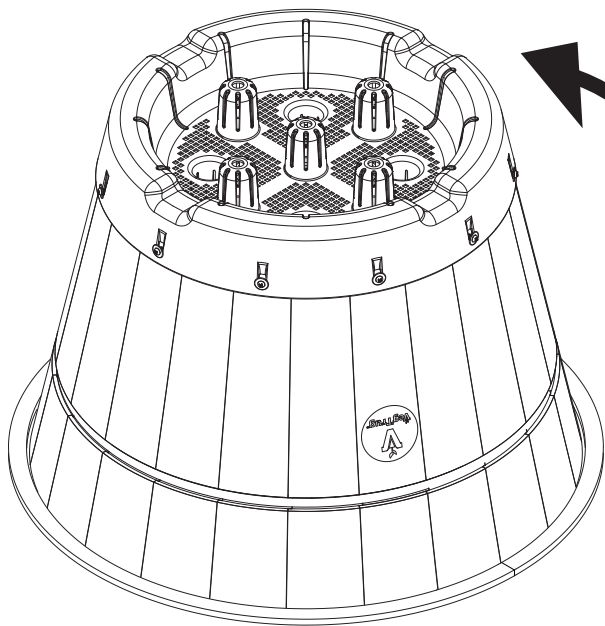

14

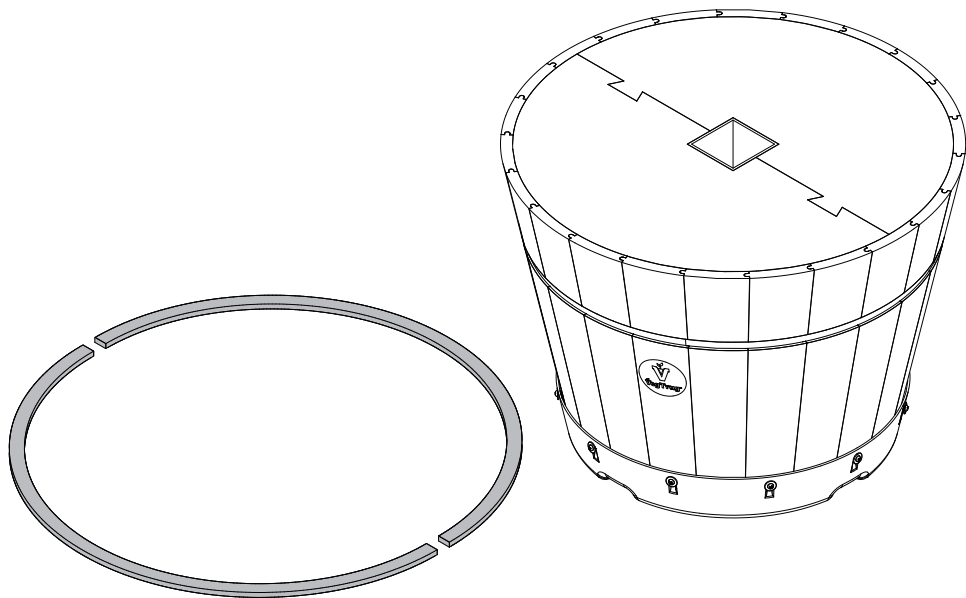

Screw in the 11 screws. Do not over tighten. Ensure screws line up in the middle of the wood slats.

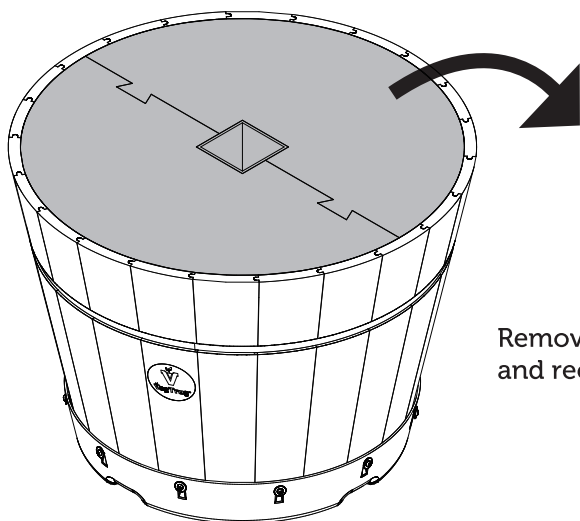

15

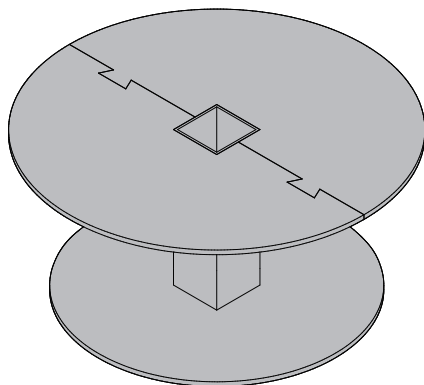

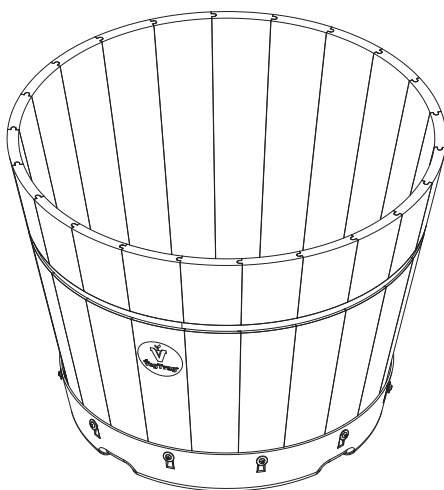

Flip the barrel upright

16

Remove cardboard stand
and recycle if possible

Congratulations!
Your DIY Barrel
is ready for
planting.

English

Attention

- Build A Barrel by VegTrug is pretreated with a food grade water based wood preservative. Please understand that the color will fade when exposed under direct sunlight unless at least one maintenance treatment is applied within each year.
- The material is natural wood which can expand and shrink though the season. Cracks on wood could occur. Cracks could be reduced by regularly maintenance.

Français

Attention

- Build A Barrel by VegTrug est prétraité avec un produit de conservation du bois à base d'eau de qualité alimentaire. Notez que la couleur s'estompera si le produit est exposé directement au soleil, sauf si un entretien est fait au moins une fois par année.
- Le matériau est un bois naturel et il peut prendre de l'expansion ou rapetisser au cours de la saison. Des fissures pourraient apparaître sur le bois. Elles peuvent être réduites grâce à un entretien régulier.

Español

Atención

- Construye un barril por VegTrug tiene un tratamiento previo con un preservante de madera de base acuosa que es seguro para usar con alimentos. Tenga en cuenta que el color se aclarará si se expone a la luz solar directa, a menos que se aplique mínimo un tratamiento de mantenimiento en cada año
- El material es madera natural, que puede expandirse y contraerse durante la temporada. Es posible que la madera se raje. Las rajaduras podrían reducirse haciendo mantenimiento con regularidad
