

## QUICK REFERENCE PLANTING GUIDE

<b>LIGHT / SUN EXPOSURE</b>	Full sun.
<b>USDA HARDINESS ZONES</b>	5 to 9.
<b>PLANT TYPE</b>	Perennial.
<b>PLANTING DISTANCE IN-GROUND</b>	12 inches.
<b>CONTAINER SIZE</b>	12 inches or larger.
<b>MATURE HEIGHT / SPREAD</b>	10 to 12 inches.
<b>BLOOM TIME</b>	Early summer to late fall.
<b>TIME TO REACH MATURITY</b>	Starts to bloom once planted and will bloom all summer.
<b>FACTS OF NOTE</b>	Attracts butterflies, hummingbirds and bees. Deer and rabbit resistance. Heat and drought tolerant. Great border plant. Low maintenance.

**ULTIMATE INNOVATIONS**

at [ShopDePalma.com](https://ShopDePalma.com)

Ultimate Innovations offers our 30 Day Happy Customer Warranty on all plants. We want you to love our plants and our company! If you have any problems, please contact us immediately. If possible, we will try to send replacement plants or a reasonable substitution, but that is not always available. Call us at 866-833-4472 or email [PlantHelp@ShopDePalma.com](mailto:PlantHelp@ShopDePalma.com) with any questions after you receive your plants. We want you to enjoy gardening, plants and flowers as much as we do.

Caution: Do not assume any plant is safe to eat. Only parts of plants expressly grown to be eaten should be considered edible. As with any product that is not food, care should be taken to make sure that small children and pets do not ingest any part of a plant that is not expressly grown to be eaten. Unless specifically stated, this product is intended for ornamental horticultural use only and is not intended for consumption or ingestion by humans or pets. Most plants are harmless but some contain toxic substances which can cause adverse health effects. Furthermore, some individuals and some animals are sensitive or allergic to certain plants and precautions should be taken to limit or avoid physical contact with particular plants. Some plants have thorns or spines that can be painful if handled. In case of ingestion, contact a poison control center immediately. 1-800-222-1222

## BABY BLANKET WHIRLING BUTTERFLIES GAURA

\*Image on cover is representative of the type of plant(s) in this offer and not necessarily indicative of actual size or color for the included variety.

## OUT OF THE BOX

Your plants have been shipped to you in pots. Please remove the plants from the packaging right away and plant them as soon as possible following the planting instructions below.

If it is not possible to plant them right away, follow these important steps:

1. Roll the plastic down around each plant and place them in a sunny location.
2. Keep the plant well watered.

Note: Some leaves may appear wilted or yellow upon arrival. This is due to the stress of shipping and is nothing to worry about. Water the plant and let it recover in a shady location for a few days, then gently remove any foliage that does not recover to allow for new growth.

SHIPPED IN A 3.25-INCH POTS. PLANT SIZE MAY VARY BASED ON GROWING CONDITIONS.

## PLANTING INSTRUCTIONS

**Important:** Thoroughly hydrate the plant by submersing the root zone in a container of water for 10 minutes while you prepare for planting.

1. Remove and discard the clear plastic bag from around the pot.
2. After watering, remove the pot by holding the plant upside down in one hand and squeezing the sides of the pot with the other.
3. Prepare the root ball for planting by gently disturbing the surface roots with your fingers, fork or gardening tool and pruning any damaged roots. This will encourage the roots to begin growing outward into the new soil.
4. Dig a hole twice as deep and twice as wide as the plant's root ball. Partially backfill the hole with soil and place the plant into the hole. The top of the root ball should be level with the ground surrounding the hole. Refill the hole with soil, firming the soil around the plant with your fingers. Check to be sure the plant is not planted too deeply. If it is, raise the plant carefully and re-firm the soil.
5. Water thoroughly.

## SOIL PREPARATION

We recommend having your soil tested periodically by your local County Extension Office ([www.nifa.usda.gov/extension](http://www.nifa.usda.gov/extension) or by calling 1-800-333-4636). A soil test can determine if your soil needs any amendments to enhance the growth and performance of your plants.

Ideal garden soil is easy to dig in and drains well while still holding the nutrients and water vital to plant growth. To prepare a bed for in-ground planting, spade or till the soil to a depth of roughly 12-18 inches. Next, spread a 2-4 inch layer of organic matter such as compost, shredded leaves or peat moss over the soil and mix well.

## CONTINUING CARE

### WATERING

Adequate and consistent watering is essential during your plant's first year in the garden. Infrequent, long soakings of water that thoroughly saturate the soil are more effective than frequent, light applications of water.

Due to variable geographical and environmental conditions, a specific watering schedule is difficult to define. However, as a rule of thumb, you should not allow the soil or the original root ball to completely dry out. During the first summer, you may need to water as often as every few days in periods of drought and extreme summer heat. To determine if your plant needs water, dig a few inches into the soil next to the plant.

If the soil is dry 2-3 inches below the surface, it is time to water.

Over-watering can be as damaging as under-watering. Be sure that the area surrounding your plant has adequate drainage to move water away from the plant. If you choose to plant in a container, always select one with drainage holes to prevent your plant's roots from sitting in water.

Once they take root, plants can tolerate drier growing conditions.

### MULCHING

Apply a 2-4 inch layer of shredded bark, compost, leaves, straw or other organic matter around your plants to promote moisture retention, maintain even soil temperatures and discourage weed growth. Replenish the mulch as needed.

### WEEDING

Keep the area around your plants free of weeds. Weeds compete with surrounding plants for food, water and light. Walk around the garden periodically and pull weeds, including the roots, as soon as you see them.

### FEEDING

Feed your plants once every 2 weeks during the growing season with a water-soluble fertilizer.

### PRUNING

Cutting back the stems of gaura after the first main bloom will encourage a tidy plant and spur repeat blooming however, it will benefit from serious cutting back toward the end of the summer along with a boost of fertilizer to reenergize the plant.

### WINTERIZING

Watering thoroughly in late fall will greatly enhance your plant's cold tolerance once the ground has frozen. While gaura is winter hardy in most zones, it will benefit from mulching in cold areas. The time to winterize your plants is in late fall. When winterizing perennials, keep in mind that the root system is the most vulnerable to cold damage. Mulch heavily by mounding a 6-8 inch layer of shredded bark, compost, leaves, straw or other organic material over the crown of each plant. In cold areas, containerized plants can be brought into an unheated, protected area such as a garage or cellar before temperatures drop below freezing. Check soil moisture every 2-3 weeks and water as needed during winter. In spring, remove mulch from in-ground plantings. Containerized plants should be moved back out into the garden sunlight where they will begin to repeat their yearly garden performance.

## FREQUENTLY ASKED QUESTIONS

### How should I plant my Gaura?

Your Gaura performs best in fast draining sandy potting soil so make sure your pot or planting area has good drainage. If you have heavy clay soil, amend it to improve its texture or consider planting in containers instead. If you are planting in a garden bed, prepare the soil with an organic material to ensure richness.

### Where should I plant my Gaura?

Gauras are ideal for full sun and partial shade beds, borders, and containers. These are a perfect addition to your butterfly garden. Fantastic for containers, planters, rock gardens and a perfect addition to make a cottage garden.
