MAKE ONE-OF-A-KIND TWISTED ACCESSORIES WITH LOOPDEDOO®.

Loopdedoo® is a new spinning loom that makes fabulous wrapped accessories which we like to call Loopdies®. Making bracelets is fast, easy and fun. Just wrap your threads around the Loopdedoo, turn the knob, guide the thread and minutes later you're done! You can also make necklaces, anklets, belts and more.

There's no pattern to follow so each accessory is completely unique, just like you and your friends. You can use as many threads and color combinations as you like and you can make them thick, thin or anywhere in between.

The design possibilities are endless, so let your creativity be your guide.

Learn to make basic Loopdies, longer accessories, and other Loopdedoo styles at annwilliamsgroup.com/instructional-videos.

WHAT'S INCLUDED

- 1 Loopdedoo Tool (complete with push-out drawer for storing your gear)
- Instructions
- 18 Skeins of Embroidery Thread
- 2 Alligator Clips (for making longer accessories, necklaces, belts, etc.)

SELECT ONE OF THE SIX BASIC LOOPING STYLES

They're listed in order of difficulty.

SWIRL

TWIST

ZIGZAG

ZIGZAG TWIST

COLOR BLOCK

LOOPY TWIST

SELECT YOUR THREADS

Pick any color combination you like and as many threads as you want. Loopdies can be thick or thin, and made with one thread or dozens.

DETERMINE YOUR BRACELET LENGTH

Determine your desired bracelet length by measuring snugly around your wrist and adding one inch. Remember this measurement, you'll need it later for *Step 7 on page 11*.

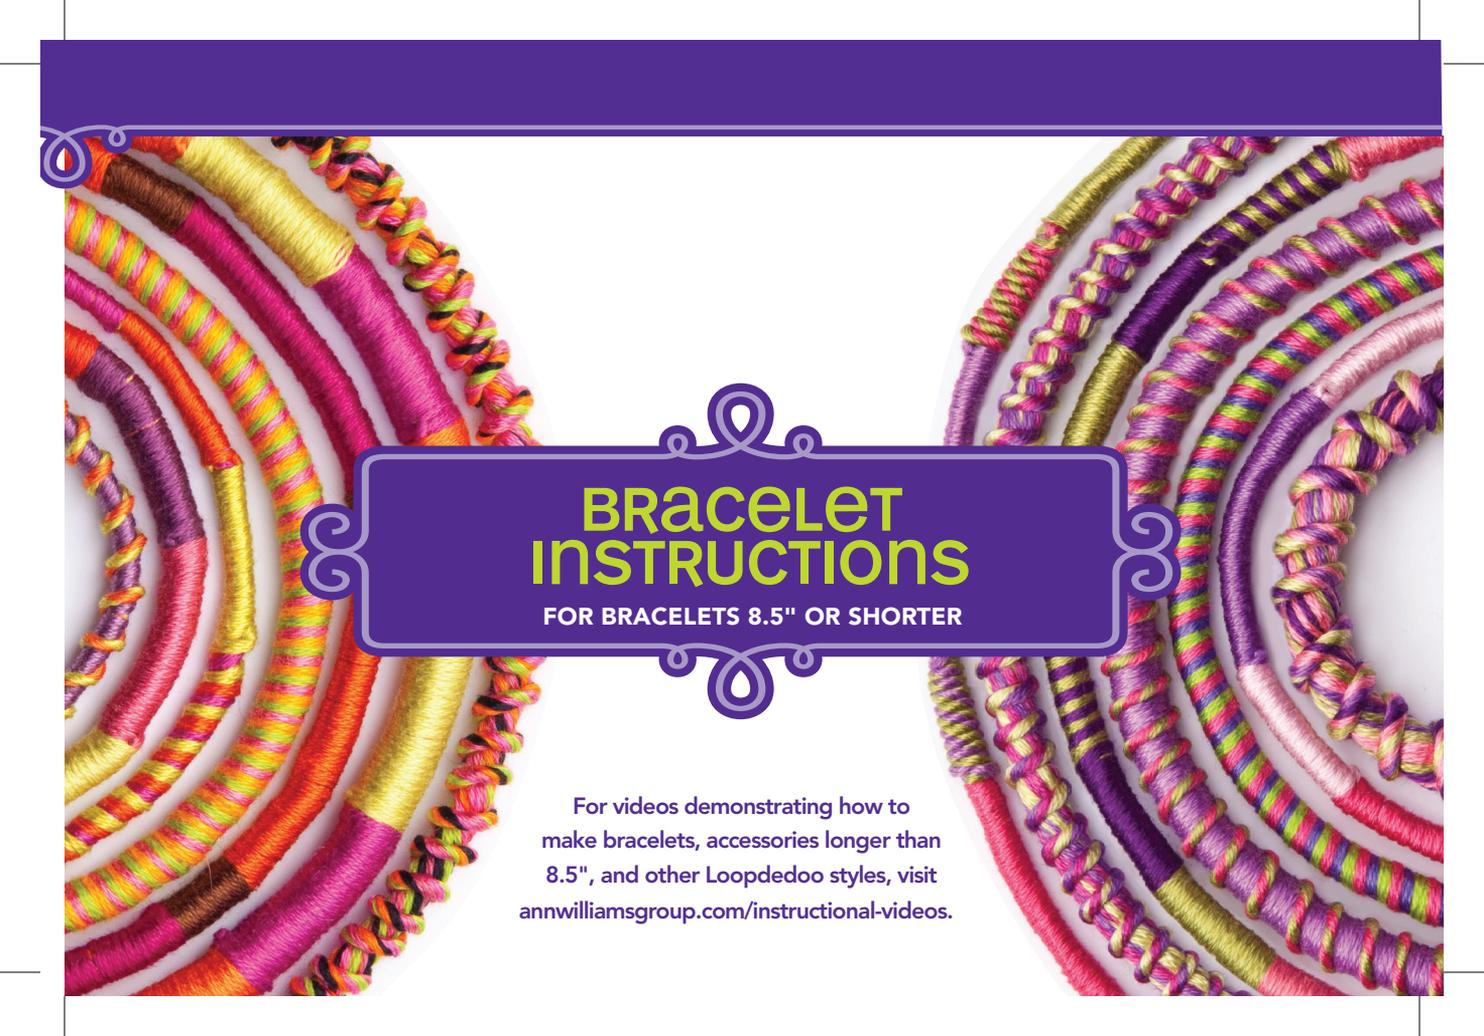

BEFORE BEGINNING

GUIDE UNDERSTANDING YOUR LOOPEDOO

Following the instructions will be easier if you learn these terms before you begin.

**From page 3.*

BRACELET INSTRUCTIONS

FOR BRACELETS 8.5" OR SHORTER

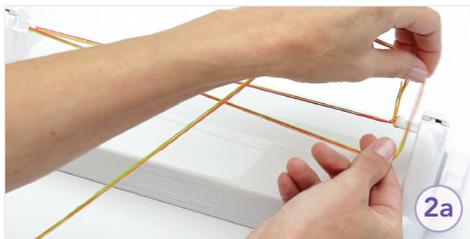

For videos demonstrating how to
make bracelets, accessories longer than
8.5", and other Loopeddoo styles, visit
annwilliamsgroup.com/instructional-videos.

BASIC INSTRUCTIONS

STEP 1 MAKE A STARTER KNOT

- Gather your threads together.
- Double knot them onto a hook (1).

STEP 2 CREATE THE CORE

- Loosely wrap threads back and forth around the hooks until you have the thickness you want (2a).
- Wrap as few as 3 lengths for a thin Loopdie, or up to 23 lengths for a thick one.

NOTE: 1 LENGTH IS THE DISTANCE BETWEEN THE HOOKS.

- Stop wrapping at the end opposite your starter knot (2b).
- Hold onto thread, but don't cut yet.

NOTE: IT'S NORMAL FOR YOUR HOOKS TO CHANGE ALIGNMENT. IN THIS INSTANCE, TO THREAD YOUR LOOPDEDOO, JUST TURN THE KNOB SO ONE HOOK IS POINTING TOWARDS YOU AND THE OTHER HOOK AWAY FROM YOU, THEN WRAP THE THREADS IN A LARGE CIRCLE AROUND THE HOOKS.

STEP 3 MEASURE THE LOOPING THREAD

Looping thread is what you'll wrap around the core to create the design of your Loopdie:

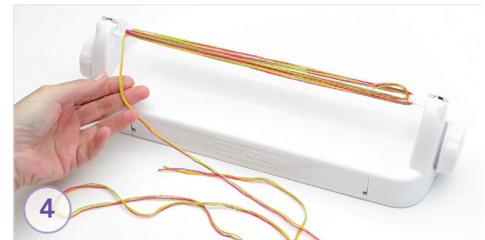

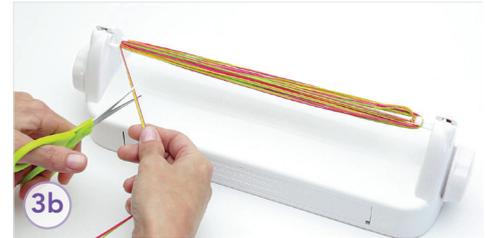

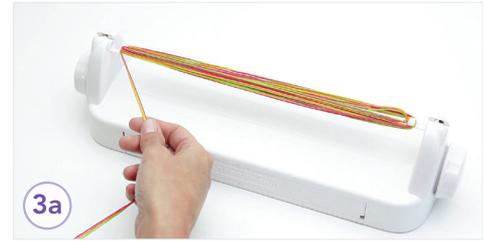

- To measure your looping thread, continue wrapping threads around hooks:
 - For a thin Loopdie, wrap 4 additional lengths.
 - For a thick Loopdie, wrap 6 additional lengths **(3a)**.
 - Remember 1 length is the distance between the hooks so every time you wrap around 1 hook that is counted as 1 length.

NOTE: IF YOU WANT TO WRAP THE ENTIRE LOOPDIE IN ONE THREAD, THEN ADD 3 EXTRA LENGTHS.

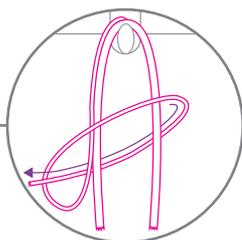

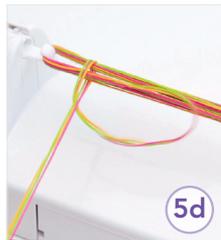

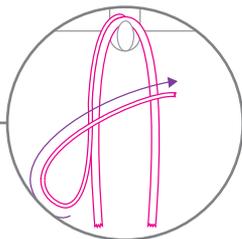

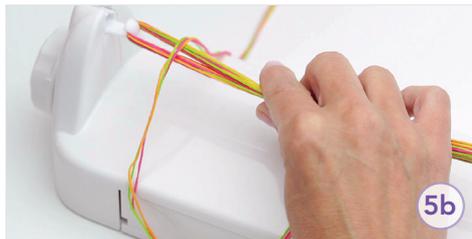

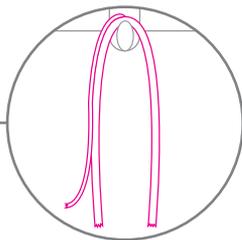

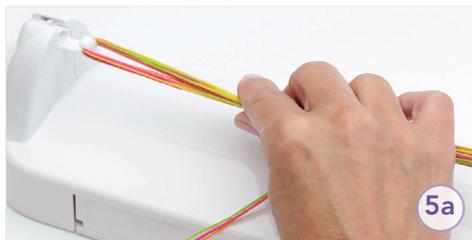

- Cut the remaining thread **(3b)**.

STEP 4 REMOVE THE LOOPING THREAD

- Remove the looping thread from the hooks; leave core thread on hooks **(4)**.

BASIC INSTRUCTIONS

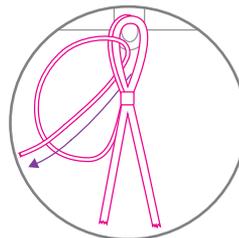

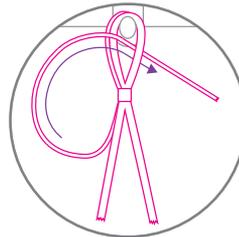

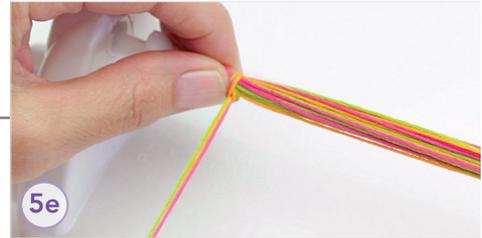

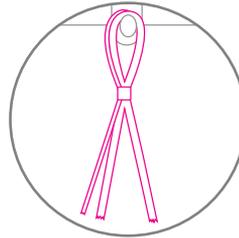

STEP 5 CREATE AN ATTACHMENT LOOP

- At hook opposite your starter knot, hold all the threads together (5a).
- Place your looping threads over the top (5b).
- Pull them through (5c, 5d).

BASIC INSTRUCTIONS

- Pull tight, about a finger's width away from the hook (5e).
- Put your looping thread through the attachment loop you just created (5f).
- Pass the threads through the loop you created in the step above so it makes a knot. (5g).
- Your Loopeddoo is now threaded and it's time to loop away.

BASIC INSTRUCTIONS

STEP 6 LOOP AWAY

- Hold the looping thread and guide it along the core (6) as you turn the knob with your other hand.

TIP: ALWAYS KEEP THE LOOPING THREADS PULLED TAUT SO YOU GET A NICE, TIGHT WRAP. IT HELPS TO HOLD YOUR HAND CLOSE TO THE BRACELET AS YOU GO.

TIP: YOU CAN USE EITHER KNOB, AND EITHER HAND TO GUIDE THE THREAD.

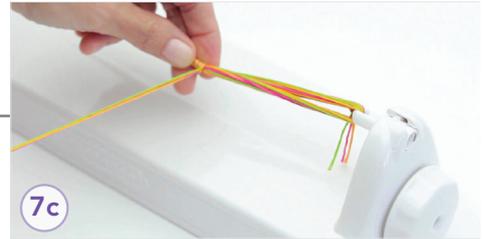

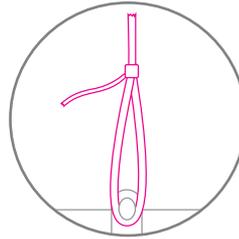

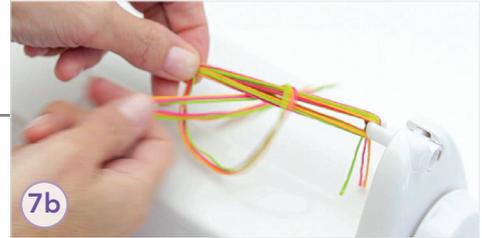

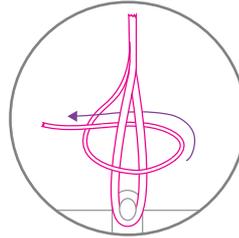

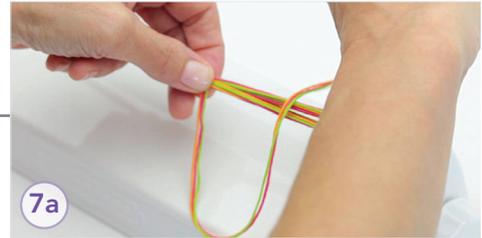

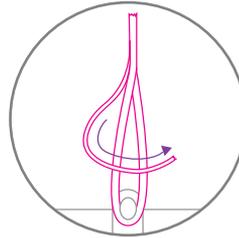

- For instructions on how to make different looping styles, please reference the Style Guide starting on *page 13*.

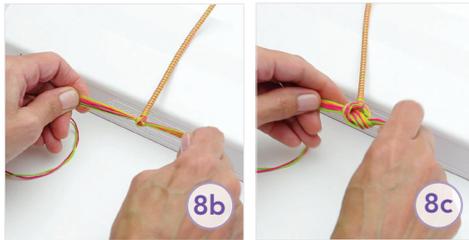

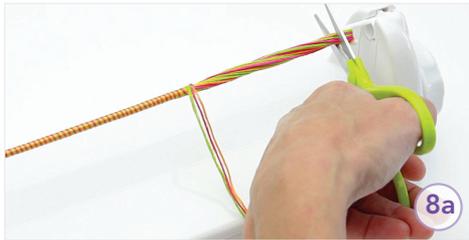

STEP 7 END WITH A DOUBLE LOOP KNOT

When you reach your desired length
(*determined on page 3*), tie a double loop knot:

- While holding the finished threads in place, put your looping threads over the top (**7a**).
- Pull them through (**7b**).
- Pull tight, and repeat (**7c**).

BASIC INSTRUCTIONS

STEP 8 FINISHING KNOTS

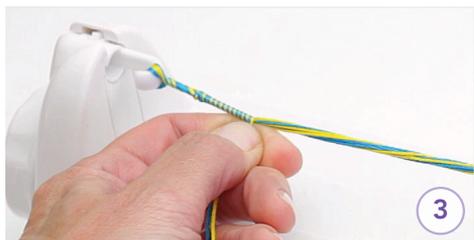

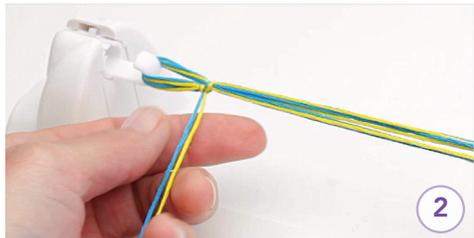

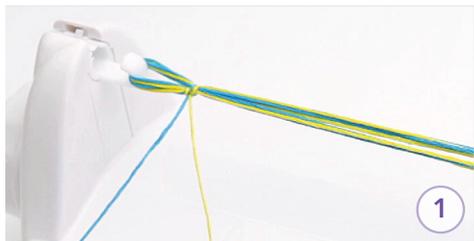

- Cut the threads close to the hook by the starter knot, but don't cut the looping threads **(8a)**.
- Separate all threads in half, making sure there are some looping threads in each half **(8b)**.
- Tie a tight single knot **(8c)**.
- Tie on your Loopdie by putting half of the thread through the attachment loop **(8d)** and tying a tight double knot.

STYLE GUIDE

INSTRUCTIONS FOR 6 BASIC LOOPING STYLES

STYLE GUIDE

We suggest starting with 2 threads to make it easier but you can use up to 4 threads with a thicker core.

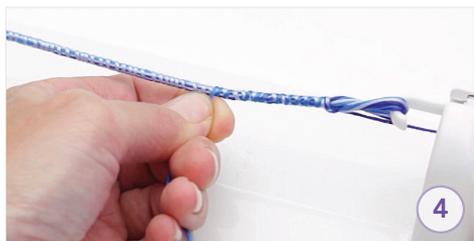

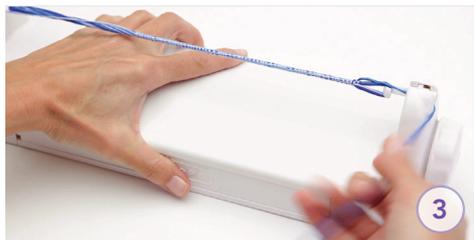

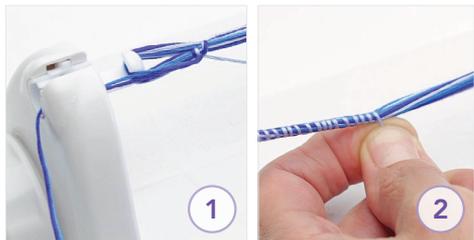

- Separate your looping threads so they don't overlap while you loop (1).
- Hold them close together (2).
- Guide while turning the knob (3).
- Once you have reached your desired length, finish as usual (*pages 11-12*).

- Gather all your looping threads (1).
- Twist them in the same direction that you are looping (2).
- Guide them into position as you turn the knob (3).
- Repeat these steps until you have reached your desired length, then finish as usual (*pages 11-12*).

STYLE GUIDE

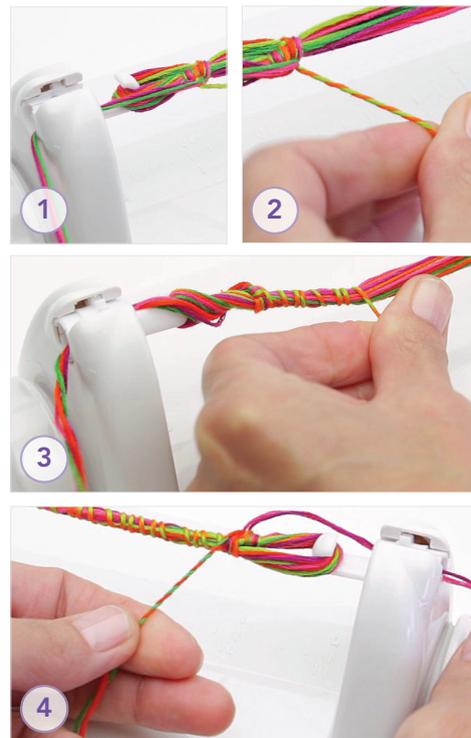

Begin with 3 or more threads. With this style you flip the Loopeddoo around after each thread so they criss-cross each other.

- Select 1 thread then place the rest through the gear slot near the attachment loop **(1)**.
- Guide the thread, spacing it randomly **(2)**.
- When you get to the end, tie a double loop knot ([page 11](#)) and place any remainder through the gear slot by the starter knot.
- Flip the Loopeddoo device around **(3)**.
- Select your next thread **(4)**, repeat above steps, then finish as usual ([pages 11-12](#)).

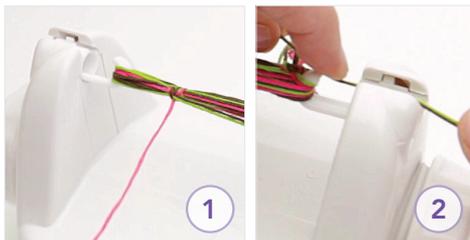

This style works best with 4 or more threads.

- Select 2 or more threads and place the rest through the gear slot by the attachment loop (1).
- Twist the threads in the same direction as you are going (2).
- Guide the thread, spacing it randomly (3).
- When you get to the end, tie a double loop knot (page 11) and place any remaining thread through the gear slot by the starter knot.
- Flip the Loopeddoo device around.
- Select your next thread (4), repeat above steps, then finish as usual (pages 11-12).

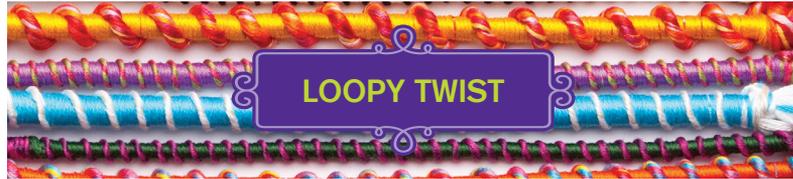

STYLE GUIDE

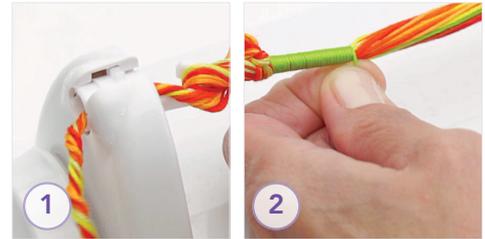

- Select the first color, or looping thread, you want to use (1).
- Place the rest of your threads through the gear slot by the starter knot to keep them out of the way (2).
- Now turn the knob and guide the thread (3).
- At end of a color block, tie a loop knot ([page 11](#)).
- Select your next thread (4-5), repeat above steps, then finish as usual ([pages 11-12](#)).

LOOPY TWIST

The Loopy Twist is similar to the Twist, but first you wrap the whole Loopdie in 1 color.

- Select that 1 thread (it should have been measured longer than the rest based on [page 7](#)). Place the rest of your threads through the gear slot by the attachment loop to keep them out of the way (1).
- Turn the knob and guide the thread (2) until you have reached your desired bracelet length, then end with a double loop knot ([page 11](#)).
- Remove your threads from the gear slot.
- Twist them in the same direction that you are looping (3).
- Guide them into position as you turn the knob (4).
Finish as usual ([pages 11-12](#)).
