

Did You Know?

Just Add Water

Use **cold** water to **firm** up your scrubber when the cleaning gets tough (burnt/sticky messes). For added power, immerse in ice water or dampen and store in the fridge. **Warm** water creates a **soft** and compressible scrubber, perfect for accessing tight areas or producing a soapy lather.

Absorption

Scrub Daddy's FlexTexture® material absorbs less water than a common sponge.

Scent

Lemon scent will gradually dissipate over time.

Keep it Clean

For best results, rinse thoroughly and let air dry after use. To release stubborn debris, massage under warm running water. Scrub Daddy products are microwave safe for up to 1 minute.

Life Span

The unique foam used in Scrub Daddy products will deteriorate over time. The rate at which this occurs will vary depending on individual use. A torn or crumbly Scrub Daddy may still help in your basement or garage.

Use Less Chemicals

Try using our products with just water before reaching for the soap. They do an amazing job on their own! For messes that require a detergent, we recommend using a mild dish soap, baking soda, or vinegar. Avoid harsh chemicals for maximum service life.

Scratch Free

Have concerns about scratching one of your surfaces? Test a small and inconspicuous area first.

Absorption

Scrub Daddy's FlexTexture® material absorbs less water than a common sponge.

Color-Coded Cleaning

Multiple colors help to reduce the chance of accidental cross-contamination.

Did You Know?

Just Add Water

Use **cold** water to **firm** up your scrubby FlexTexture® side when the cleaning gets tough (burnt/sticky messes). For added power, immerse in ice water or dampen and store in the fridge. **Warm** water creates a **soft** and compressible scrubber, perfect for accessing tight areas.

Absorption

The soft and spongy ResoFoam® side of your scrubber is ideal for wiping away drips and soaking up spills.

Color-Coded Cleaning

Multiple colors help to reduce the chance of accidental cross-contamination.
