

[Sun Joe Propane Generator FAQ's](#)

[Information Provided by Sun Joe – 9/27/2021](#)

[FAQs](#)

[What kind of oil does the generator use and how do I fill it?](#)

Using the included oil funnel, fill the oil reservoir with SAE30 or "straight 30" oil, which can be found at your local hardware store or gas station. Your Power Joe comes equipped with a low oil sensor with an automatic shut off feature, so if your engine shuts off during operation, please check the oil level to ensure it is sufficient for proper operation.

[Does the Power Joe have any built-in safety features?](#)

The transport handle on the Power Joe is specifically designed for both easy transport and proper safety to keep the user at a safe distance from the machine while transporting. When collapsing the handle for easy storage safety is also ensured with Power Joe's secure handle design. After the user assembles the lock pin according to the manual instructions, the lock pin will secure the handle automatically while the user lifts the handle in place; if the user wishes to collapse the handle, he/she will need to pull out the lock pin intentionally and then fold down the handle accordingly.

[What type of starting mechanism is SJG4100LP equipped with?](#)

Power Joe comes equipped with PowerSTART as part of its exclusive PROPOWER3X technology and uses a 24-Volt iON+ rechargeable lithium-ion battery to power the generator's One-Touch Start feature. This same battery also powers over 100 tools in the Sun Joe + Snow Joe iON+ cordless tool system, so when your battery is not in

use powering Power Joe, you can use it interchangeably across multiple tools in the iON+ platform. With PowerSTART, there's no more back-breaking rip cords to pull - you can now start your Power Joe with just the push of one button. As a backup start-up option in the event your battery is recharging, you can still start Power Joe via its included recoil start feature.

[What devices can I power with Power Joe?](#)

Power Joe is a versatile powerhouse that can power all your devices with its multiple, onboard outlet options:

USB-A and USB-C ports: to keep your phones, laptops, tablets, and electronics charged

2X standard 120V outlets: for all standard plugs, like lamps, kitchen appliances, heaters + AC

120 V AC twist-Lock receptacle: to power high-vibration devices with twist-lock plugs like power tools, pool pumps and medical equipment

RV outlet: for campers and RVs, so even when on-to-go or at the campsite you're never without power!

[How long is Power Joe's propane connection hose?](#)
