WHAT IS BED OF NAILS?

Bed of Nails brings similar benefits from treatments, such as acupuncture and massage, into the homes and workplaces of people everywhere to create and sustain a healthy lifestyle amid the stresses of a modern world. The mystical bed of nails originated over 1,000 years ago and was used by gurus in the practice of meditation and healing. Bed of Nails® has created a modern, ergonomically designed version of that ancient acupressure technology, with a Swedish twist, to model those same deep healing effects.

HOW DOES BED OF NAILS WORK?

With the pressure of the rounded nails against the skin, Bed of Nails provides acupressure, which is similar to acupuncture without penetrating the skin.

An excellent aid in self-treatment, Bed of Nails is a massager used to relieve minor muscle aches and pains. Bed of Nails also helps to create a soothing atmosphere for relaxation and helps create a relaxed atmosphere for sleeping. Bed of Nails also helps to temporarily increase localized circulation where applied. Everybody reacts differently to Bed of Nails, and the effects may vary from time to time, depending on when it is used. You may experience feelings of relaxation, sleepiness, alertness and a clearer mind. For more information and to check out our Bed of Nails line please visit bedofnails.org

WHY BED OF NAILS?

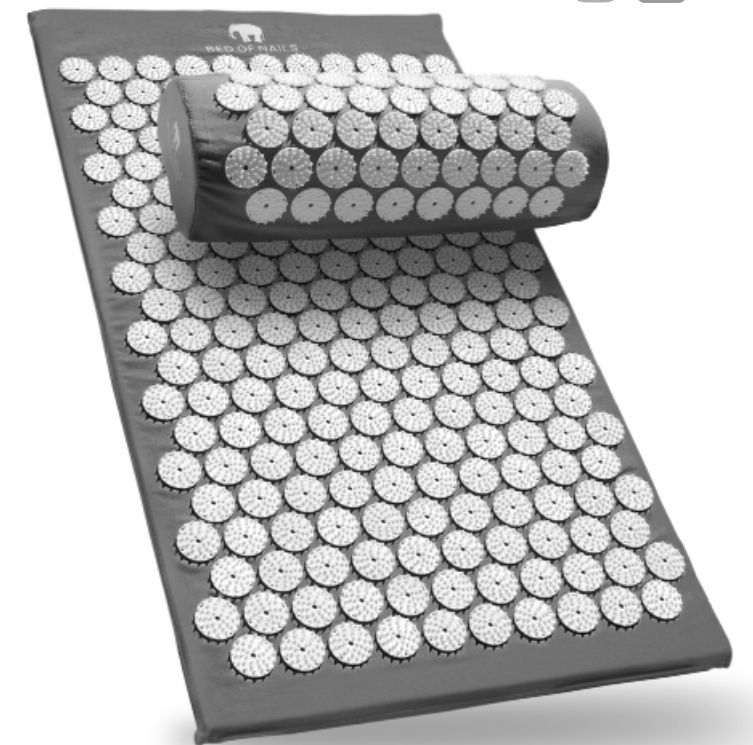

Bed of Nails started the global acupressure mat movement back in 2009. We've worked hard to create the most comfortable and practical acupressure products on the market. How? We added more nails and made our products safe for you and for the environment. Made with 100% non toxic recyclable HIPS plastic melted (free from glue) onto 100% organic cotton fabric, PU foam. Certified REACH, RoHS.

WARNING!

This box contains a Bed of Nails which has sharp plastic nails on one side. Please keep away from small children and pets. Should not be used in case of skin irritations, hemophilia or the intake of anticoagulants. If you are uncertain regarding any health-related issues, always consult your doctor before use. All use of this product is solely at user's risk and the producer/seller assumes no liability for any losses, injuries or damages as may result from the use thereof. The product is wrapped in plastic. To avoid danger of suffocation, keep away from pets, babies and children.
