

The Look:

Bouncy Curls

Before

1 To add bouncy curls to the blow out look, place the triStyler with bristles extended under the hair at mid shaft and slide the switch to the HIGH position.

2 Roll the triStyler all the way to the ends of the hair.

3 Wrap the hair around the barrel and roll the triStyler up towards the roots. Slide the switch to the COOL position and let the hair sit for 5 seconds.

4 Twist the cool tip of the triStyler to retract the bristles and let the hair fall.

5 Continue the same motion around the head, working your way up the sections. To help add shine and volume, spray CHI Smart Silk Volumizing Hair Spray on the finished look.
