

Luxe Blurring Micro-Airbrush™

Full Size 7-Piece Luxe Blurring Micro-Airbrush™ Wardrobe & Stand

BLURRING CONCEALER BRUSH:

For blurring away undereye darkness from view, use the Micro-Airbrush™ Blurring Concealer Brush to apply three or four small dots of concealer stretching from the inner part of the eye to the outer part and very gently blend by stippling, not spreading, the concealer. This technique paired with our ultra-luxe brush technology blurs away darkness from view for the ultimate airbrush finish.

FLAWLESS FOUNDATION BRUSH:

The Micro-Airbrush™ Flawless Foundation Brush is the recommended tool for creating a completely airbrushed effect on the skin. Dot foundation on your cheekbones, chin, forehead, and nose. With the help of ultra luxe Micro-Airbrush™ brush hairs, start blending at your forehead and slowly spread all over the face, moving in circular motions. Blend out to the jawline and hairline until the foundation vanishes. Don't forget to apply to the neck, making everything blend together for a soft-focused airbrush complexion.

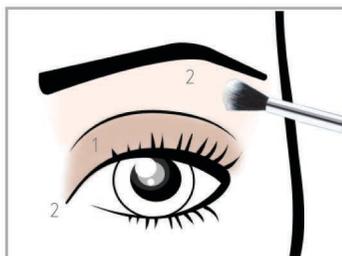

AIRBRUSH POWDER BRUSH

Use the Micro-Airbrush™ Airbrush Powder to gently airbrush your favorite powder, bronzer or luminizer all-over the face and décolleté and experience luxury while softly blurring away imperfection as it glides effortlessly and easily over the skin.

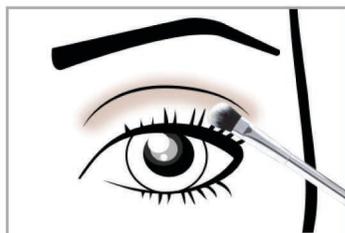

ANGLED COMPLEXION BRUSH:

Micro-Airbrush™ Airbrush Angled Complexion Brush is designed for softly blending blush, bronzer and beyond onto the skin creating a canvas for the ultimate complexion. For an airbrushed blush application, smile to bring out the apples of your cheeks, then use quick circular motions to gently sweep upward towards the hairline. To sculpt the face, dust bronzer onto places where the sun would naturally hit your face – the bridge of your nose, around the hairline, under the jawline and cheekbones.

ALL-OVER EYESHADOW BRUSH:

1. Use the Micro-Airbrush™ All-Over Eyeshadow Brush to create your eye base by applying a light eyeshadow shade over the entirety of your lid. Use a gentle sweeping motion, blending up toward the brow bone.
2. Add a tiny smudge of your highlighter shade to the inner corner of your eyes or just below your brow bone to brighten up your face.

EYESHADOW CREASE BRUSH:

Take your eyeshadow application to the next level! Gently tap the Micro-Airbrush™ Eyeshadow Crease Brush into your contour color or darker shade of eyeshade. Then starting at the outer corners of your eye slowly work toward the middle of the eye in a windshield wiping motion. The Micro-Airbrush™ technology softens color with the simple stroke of your brush.

EYELINER & EYEBROW BRUSH:

Use short strokes of the Micro-Airbrush™ Eyeliner & Eyebrow Brush to apply eyeliner from the inner corner, gliding pigment to the outer edge of the upper lid. Start with a thin line and let the line get a little thicker as you work your way across the lid.

EYELINER & EYEBROW BRUSH:

To fill in brows naturally, gently dip brush in brow powder or cream, applying to brows in short feathery strokes for the look of a natural brow.
