

Get the Look of Light!

These products give you a luminous subtle glow that kisses your skin to reveal a more youthful-looking and radiant appearance!

Get the Look

1. Apply **Eyelift in a Tube™** beginning with the **Bye Bye Under Eye® Concealer** wand side first and gently blend using your fingers to erase the look of darkness, imperfections and discoloration from view.
2. Then finish up with the **Hello Light™ Liquid Brightener** wand end by applying the Luminizer to the areas of the face you wish to appear lifted or bring forward, such as under the eyes, above the cheekbones, the center or your forehead above your brows, or straight down the bridge of your nose.
