

# The Look:

## Smooth Straight

1. Divide hair into sections, front and back, depending on the thickness of your hair.

2. Starting at the bottom section, grab a half of an inch subsection.

3. Staying an eighth of an inch away from your scalp slowly close the iron onto the hair while sliding from roots to ends (You may use a comb underneath to remove tangles while styling).

4. Continue straightening around the head until desired style is created.

4

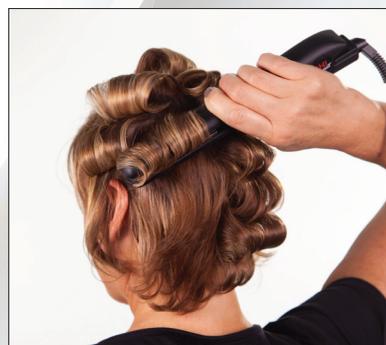

# The Look:

## Volume for Short Hair

1. Begin in the top crown section.

2. Grab a half inch section and close your iron close to the scalp and slightly pull upwards while turning your wrist downwards.

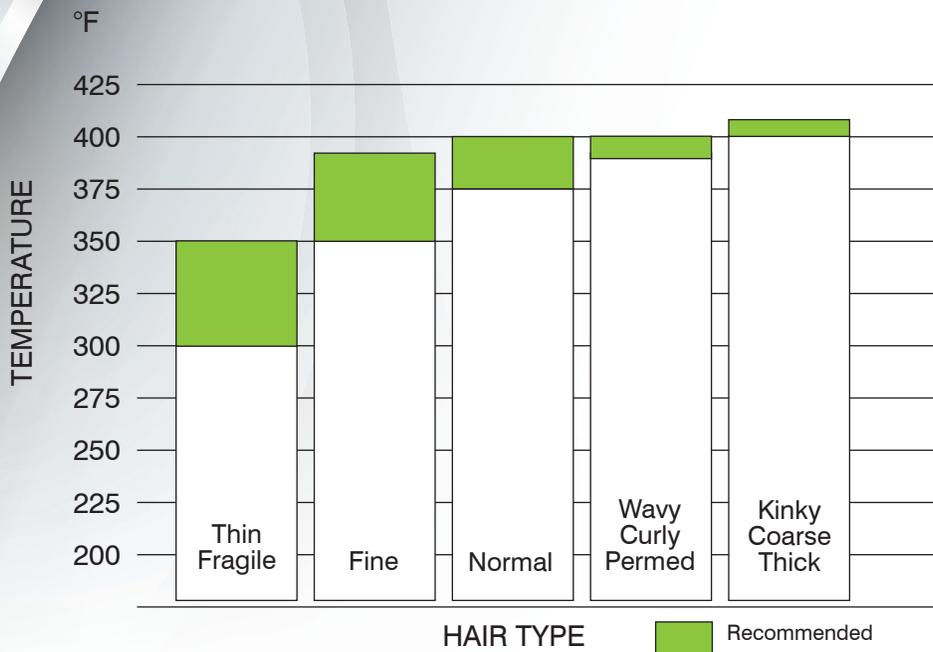

3. Continue this same motion down the back of the head. Then move to the sides and fringe area.

4. To finish your look, brush out the curls to create natural looking volume.
