

STORING

When not in use, the device can be stored in its drying stand. The stand is designed to function even with the pLink charger attached.

DRYING STAND

As a drying stand, the stand can be set on your bathroom counter, in the shower, or wherever you prefer to store your device.

1. Place the stand so that the “u” shaped curve of the stem is facing towards you.
2. Insert the device with the brush head facing towards you. The bottom of the handle should be placed in the divot of the stand's base (as shown).
