

# GETTING STARTED WITH YOUR *color me* AUTOMATIC FOUNDATION APPLICATOR

## ATTACH

Pull white tab. Lift cap to reveal the firm sponge for liquid and cream foundation. To remove sponge place fingers under sponge base and pull. For loose and pressed powder foundation use the plush, pillowy sponge. Press sponge securely onto knob-shaped mount. Wiggle in place. Sponge should be horizontal, not diagonal.

## APPLY

Push button to turn on device. Apply foundation directly to sponge. With liquid foundation coat fresh sponge with 1 pump then apply 1/2 pump on top. You can pick up powder foundation directly from your compact or lid of your jar, then shake off excess.

## TAP

Tap the foundation from sponge onto cheeks, forehead, nose and chin before blending.

## BLEND

As device pulsates, blend foundation in circular sweeping motions. For seamless application buff foundation down jawline and up to hair line. To build coverage reapply foundation to sponge and repeat. You can change sponge and apply powder over liquid. The sponges are disposable; replacement recommended after 7 uses.
