

# How To Apply

## Step 1: PRIME

Over freshly cleansed skin, shake Luminess AirSupremacy Moisturizing Air Primer for 5 seconds. Holding the can 6-8 inches away from the face, press down on the nozzle and spray 3-4 times at the center, sides, and top of the face.

## Step 2: PULSE

Over primed skin, shake Luminess AirSupremacy Spray-On Foundation in your desired shade for 5 seconds. Holding the can 6-8 inches away from the face, press down softly on the nozzle using short, light pulses or bursts, similar to apply perfume. *Do not press continuously on the nozzle or stay in one area too long as this may create unwanted blotchiness.* Spray in a circular motion around the face until desired coverage is reached. For increased or targeted coverage you may also spray foundation directly onto a blender or brush and use a light tapping or sweeping motion.

## Step 3: Touch – Up

Use the included Pro-Air Blender to blend any over-spray or blotchiness by gently tapping blender on area to remove excess makeup. The blender can also be used to clean-up eyebrows and hairline area.

## Step 4: Final Touches

Finish off your look with a few pulses of Luminess AirSupremacy Spray-on Blush, and Luminess AirSupremacy Makeup Sealant.
