

## LIFT & VOLUME

### STEP ONE

Take a section 2" wide by 1" thick and brush through section first. Starting at the ends of your hair, wrap the section around the brush top. Be sure your section evenly coats the bristles, roll down completely to the scalp and hold for 10 seconds.

### STEP TWO

Add extra volume by taking a section 2" wide by 1" thick and brush through section first. Starting at the ends of your hair, wrap the section around the brush top. Direct the section by pulling it directly forward before rolling it to the scalp. Be sure your section of hair evenly coats the bristles and hold for 10 seconds.

### STEP THREE

Repeat on all areas in which you are looking for more lift and volume.

## TIP

Your Perfecter is tangle-free.

Be sure you choose the correct size for your hair length so you are not wrapping towards scalp from the ends more than 2.5 rotations.
