

HOW TO USE

Emjoi® Micro-Pedi Nano Pro is designed for smoothing coarse skin on the feet and heels (fig. 6). Do not use this device anywhere else on the body.

Note: Only use Micro-Pedi Nano Pro Micro-Mineral rollers on dry skin.

1. Wash and clean the skin and dry fully.

Note: Do not use on broken or bleeding skin.

2. Select the Micro-Pedi Nano Pro Micro-Mineral roller you want to place it into the unit.

Extra Coarse (Blue) Micro-Mineral Roller - for normal skin.

Extreme Coarse Flex (Purple) Micro-Mineral Roller – for extremely coarse skin.

See section of Changing the Micro-Pedi Nano Pro Micro-Mineral Roller on how to remove and replace the roller.

3. Remove the protective cover from the unit and it is ready to use.

4. Turn on the unit by pressing the safety switch lock, in the center of the On/Off switch, and at the same time slide it up (fig. 7) to the desired speed.

The unit has 2 speeds:

0 Power "OFF"

1 Low speed for delicate areas of skin

2 High speed for coarse skin

Warning: the unit is very powerful. Gently rotate (back and forth or side to side) over the callous/corn/hard skin area for 2-3 seconds. Do not press hard - gently glide the unit over desired area. The unit will stop if it is pressed too hard on the skin. Stop and check if you have achieved the softness you desire. If not, go over the area for 2-3 more seconds and check again. Continue to use this method until the level of smoothness is obtained. Over use may result in bleeding or injury.

5. Turn the unit off (fig 8).
6. Rinse the skin or use a wet towel to get rid of the excess dead particles.
7. To clean the **Emjoi® Micro-Pedi Nano Pro**, please see the Cleaning section.
8. Keep the protective cover on your unit when it is not in use.
