

R45 THE REVERSAL

3-PHASE RETINOL BOOSTER SYSTEM

A proprietary patented skincare booster featuring increasing Retinol concentrations which help improve the look of skin by optimizing the epidermal layers of the skin and assisting in natural cell turnover.

FREQUENTLY ASKED QUESTIONS

How do I use R45?

Use at night after you cleanse. Apply 1-2 pumps of Phase 1 Side A and equal amount of Side B to your face massaging it into the skin (you may apply one at a time or cocktail them together). After Phase 1, advance to Phase 2 and then Phase 3. Do not skip to Phase 3. Completing Phase 1 & Phase 2 prior to Phase 3 allows the concentration of Retinol to build gradually for optimal results.

How is R45 different than other Retinol Products?

R45 is a wrinkle- filler alternative that contains gradually increasing Retinol concentrations, allowing the skin to acclimate, helping mitigate the traditional side effects associated with highly active Vitamin A products.

How often should I use R45?

We recommend using it twice a year, but you may use it more often if your skin needs an extra boost.

Can I use other anti-aging products with R45?

Due to its unique formula, R45 is all you need while boosting, so give your favorites a break! Simply resume your skincare program after completing the last phase.

The phase I was on ran out early, what should I do?

You're on your way to beautiful skin! Feel free to move on to the following phase. While each phase should last about 2 weeks, length of use depends on the amount of product applied (1 pump versus 2).

Once I complete Phase 3, what do I do?

While this is a designed to be a booster beauty treatment, you may go back to your nightly regimen or even re-start the program right away.

How do I maintain my results after a full beauty treatment?

We recommend using BEAUTYBIO's *The Nightly Peptide Filling Serum* followed by your favorite moisturizer (we love *The Ultimate Hypervitamin Cream* or *The Quench Cream* for more intense hydration).

Can R45 be used in conjunction with GloPRO®?

Absolutely! Prep your skin with the GloPRO® Skin Prep Pads and use the GloPRO® Face Attachment for 1 minute, rolling in different directions. Immediately after, apply R45 The Reversal. Due to the exfoliation benefits GloPRO® provides, increased sensitivity may occur when using together. If you need to skip a day go for it! Simply pick back up where you left off.

Should I use SPF?

We recommend using SPF30 or higher while using any retinol products to help protect your skin.

R45 The Reversal is clinically shown to help address the look of the 4 benchmarks of aging in 45 days.

WRINKLES

PORES
