

How to use Tips

1) Allow your skin care products (moisturizer and sunscreen particularly) to COMPLETELY absorb. This means you should not be able to "see" any moisturizer sitting on top of your skin.

2) Then apply two pumps of GENIE Instant Line Smoother into your hand and apply all over your face including your eyelids and down your neck onto your decollete. **DO NOT RUB THE PRODUCT IN.** This is a "Goldilocks" product and since everyone's skin and skincare regimen is different, it may take a few tries to find what works for your skin best. If you do not experience enough of a smoothing effect, then use more product. If it feels like "too much" then use less product.

3) It should be dry in about 2-3 minutes. Then apply your make up as usual. If using liquid foundation, use 1 pump of foundation to 2 pumps of line smoother and blend them together. If you use powder foundation, apply after your Instant Line Smoother has dried.
