

FAQ's

Calista Intensify Volumizing Styling Foam and Duet Prep + Post Multi-Use Hairspray

How do I know these products will work on my hair? **Intensify** and **Duet** are universal products we use at Calista Salon on most client visits. Both are formulated with unique ingredients that are suitable for most hair types, especially for clients looking for body, bounce, enhanced texture, shine, and touchable yet lasting style.

When do I use these products? **Intensify** is a liquid that turns to a foam when dispensed and is meant for damp hair. You will use this on freshly shampooed, damp or towel-dried hair and follow up by styling hair as usual. **Duet** is a true innovator of a product and can be used on dry hair pre and post style. Use **Duet** as a prep spray and spritz each section of hair while curling or styling. Then, use **Duet** as a setting spray to finish the completed look.

How much should I use? Start with two pumps of the **Intensify** foam and apply the product from roots to ends. If you no longer feel it on your hands and haven't worked the product completely through your hair, add two more pumps and apply to the areas still needing product. For **Duet**, a good rule of thumb is to mist evenly over each section. Your hair should be evenly coated with spray. If you are seeking a lighter hold, spray lightly and about 8 inches away from the head. For a stronger hold, spray each section more generously and hold slightly closer, about 6 inches away from the head.

How should I use these products? Again, use **Intensify** on towel-dried damp hair. Add 2-4 pumps (depending on hair length and thickness) and work evenly throughout hair. Let hair dry naturally or blow-dry hair for added volume and style as usual. Finish off your style by holding Duet Post + Prep Multi-Use Hairspray 6" to 8" away from hair and misting evenly over each section. Use as a texturizer by spraying Duet Prep + Post and separating hair for a tousled look, or as a finishing spray on styled curls or waves.

How is the Intensify Foam different from other mousses? **Intensify** is a volumizing styling foam that promotes volume, fullness, and body to hair. You will notice **Intensify** is in liquid form while in the bottle but dispenses as a foam. **Intensify's** unique liquid-to-foam weightless formula keeps hair bouncy and full for a perfect, lasting style.

How is Duet Prep + Post Spray different from other sprays? **Duet** is a setting spray that is multi-faceted: sets hair while styling, texturizes strands, and delivers hold on your finished style. This spray's formula is light enough to keep hair flexible and strong enough to hold a soft, touchable look that is lasting.

Will using two products be too much or too heavy on my hair? **Intensify** and **Duet** are quality styling products with unique key ingredients to deliver volume, texture, shine and hold. Because the formulation is concentrated you

may realize a little bit of product goes a long way. Once you figure out the right amount of each product for your hair, you might find that using multiple products on your hair maximizes the styling results.

Will I need any other products to style my hair? Intensify and Duet will accomplish most results you are looking to achieve by using styling products. The ingredients and formulation of each product promotes body, fullness, tousled texture, shine, and a touchable hold.

Can I use these products with my other favorite products? Yes, you will find **Intensify** and **Duet** are compatible with other styling products you may already use at home. If you use a serum, cream, or thermal protector of any kind, use **Intensify** on damp hair directly after you've applied any other product. If using other products, we recommend using **Duet** as your final step when finishing off your beautifully created style.
