

# HAIRDO & KEN PAVES

## FAQ & TIPS FROM KEN

- 1. How do I adjust the parting?** Use a blow dryer on a low setting to re-direct the fibers. Take your time and move the hair in multiple directions until the part line is more visible. A little spritz of water ahead of time will help. Put on a headband while the fiber is cooling. Once completely cool use hairspray or styling products to set the part the way you like
- 2. How do I get comfortable wearing my new topper?** Approach this like you would training wheels. First, wear it with a cap or head band so it feels secure. Then wear it alone and use a couple of bobby pins to clip back bits of the topper as you would your own hair. Pull out some of your own hair where possible. With longer toppers you can put in a braid or incorporate into a style
- 3. What if I want a little less hair?** Take the topper to your stylist so that they can thin out any bulk and shape the style to your specifications
- 4. What if I want a little more hair?** Be sure to shake and run your fingers through the topper before trying it on. It may be that the fibers just need to be redistributed and fluffed. Don't be afraid to use a volumizing product or a hot tool on a low setting
- 5. How do I make the clips more secure-** the clips are designed smaller so the topper lays flatter on the head. Lightly teasing/back combing your own hair before attaching will help to improve the grip of clips. You can also spray the clips with hairspray or texturizer but nothing that adds shine or oil. Press the clips down and then up into the hair. Be sure to secure the front clip first then attach the side clips second and at the same time
- 6. How do I minimize hair-fiber shine?** Brush in a little dry shampoo, but remember: your topper is new, and with a day or two of wearing, the shine will lessen.
- 7. What are the top 3 mistakes people make when receiving the topper**
  - They look at the color out of the box and decide it is not right before trying it on. Colors are made to blend not match
  - They try it on without shaking or brushing it. The topper will always look flat this way
  - They attach it before trying out different positions on the head. Take time to play with it. Move it around before clipping
