**Precious Metal Jewelry**

**Cleaning & Care**

---

**Clean Gently**

✧ Please use care when cleaning your precious metal jewelry.
✧ Rinse with warm water and dry thoroughly with a soft cloth.
✧ Do not use ultrasonic cleaners, polishing creams, or polishing cloths, as these often contain chemicals and fine-grain abrasives.

**Keep It Protected**

✧ Jewelry and household chores don’t do well together.
✧ Before cleaning or doing other work around the house, please take off all jewelry items.
✧ Keep your jewelry away from extreme heat and cold.

**Store It Properly**

✧ Understand that metal can scratch or scuff other metal.
✧ Diamonds and hard gemstones can destroy precious metal luster and dull its polish.
✧ Protect each piece by storing it in its own individual container or compartment.
